About the Author

Peter Pollock is a long-time blogger at `PeterPollock.com`, a conference speaker, husband, stay-at-home dad, and, of course, author.

He's also a web hosting trainer and geek (he was so excited to get an iPad that he made up a song and dance about it).

British by birth, he currently lives in California's Central Valley with his wife and three children. He ran a web hosting business for nine years, and has been building websites for even longer than that. This has led him to fall in love (possibly a little TOO much in love) with WordPress, and he can't understand why anyone would use anything different to build a site.

Peter also writes children's books in his spare time, although "spare" time is a little difficult for him to find these days.

Ultimately, Peter's passion is to help others achieve their goals with their websites and blogs — and he believes that, with a little help, anyone can have an awesome site — without having to spend thousands of dollars to make it.
