Oracle Press™

ONLY FROM OSBORNE

Expert authors, cutting-edge coverage, the latest releases...find it all at OraclePressBooks.com

Online, you'll find:

- FREE code for selected books
- FREE sample chapters
- Complete online Oracle Press catalog
- Details on new and upcoming Oracle Press titles
- Special offers and discounts
- Enter-to-win contests
- E-Books available
- News and press information
- Information about our expert authors
- Details on how to write for Oracle Press
- And much more!

From a full selection of titles focusing on Oracle's core database products to our in-depth coverage of emerging applications, Web development tools, and e-Business initiatives, Oracle Press continues to provide essential resources for every Oracle professional. For a complete list of Oracle Press titles—the only books officially endorsed by Oracle Corporation—and other valuable resources, go to

OraclePressBooks.com.

The only Oracle-authorized guides available!

About the Authors

MICHAEL ABBEY Michael S. Abbey is a seasoned writer in the Oracle Press series, this being his tenth work. Michael is past director of conferences for the IOUG-Americas, orchestrating the delivery of its successful user-driven event IOUG-A Live! from 1997 until 2000. He has presented at conferences in Europe and North America, and is a member of the faculty for the IOUG-A's University Master Class series. Michael has been working exclusively with Oracle's technology since the 1980s, having experienced the product all the way from desktop to large mainframes. He is currently the lead DBA for the Pythian Group's dbaSource initiative, delivering off-site services to clients in North America and Europe. Michael can be reached at masii@ottawa.com. He enjoys feedback on these works and is happy to respond to quick questions.

IAN ABRAMSON Ian Abramson is based in Toronto, Ontario, in the position of CTO of Data Warehousing for Cognicase Inc., Toronto. He has over 15 years of IT and Oracle experience, focusing in all areas of the IT life cycle. His Oracle skills include design, development, and administration, having served in almost every capacity on numerous Oracle projects. Ian is also director of education for the International Oracle Users Group (IOUG), where he is a regular instructor of Oracle and data warehousing topics. In his spare time, Ian likes to play goalie at cold hockey rinks, still hoping to one day fulfill his dream of hockey stardom. Ian can be reached at ian@abramson.to.

MICHAEL COREY Michael Corey is the founder and chief executive officer of Ntirety (www.ntirety.com). Prior to founding Ntirety, Mike was CEO of Database Technologies (DBT), the first consulting company on the East Coast to specialize in Oracle. In 1997 and 1998 Deloitte & Touche, and Hale and Dorr recognized Database Technologies as the fastest growing technology company in New England and the 51st fastest growing high-tech company in the United States.

Mike is a recognized expert on relational databases and data warehousing. He has written a number of articles and books and is a frequent guest speaker at technology conferences around the world. Mike is also a past president of the International Oracle User Group and a past member of the Microsoft Corporation Data Warehousing Advisory Group. He has a B.S. in Management Information Systems from Bentley College, in Waltham, Massachusetts. Feel free to contact Mike at michael.corey@ntirety.com.

PART I

Getting Up to Speed

I Oracle: The Company and the Software	3
Terminology	4
Oracle Corporation: A Timeline	4
1977: In the Beginning	4
1978: Relational Software Inc. Is Born	5
1979: First Commercial Database Product Ships	6
1980: Oracle Systems Is Born	6
1981–1983: First RDBMS to Run on Mainframes and Minicomputers	6
1984: Version 4 (Read Consistency)	6
1985: Oracle Enters the Application Business	7
1986: The First DBMS with Distributed Capabilities	8
1987: The Beat Goes On	8
1988: Oracle Financials/Oracle CASE	8
1989: Oracle 6.2 Is Born	8
1990–1991: The \$1 Billion Mark	9

1992: Ray Lane Is Hired	9
1993: The Applications Business	10
1994–1995: \$2 Billion in Sales and the Network PC	10
1996: Oracle Enters the Consumer Marketplace	11
1997: Oracle8 Released	11
1998: Oracle Supports Linux	11
1999: Oracle8i Released	12
2000: Number One	12
Current Offerings	12
Chapter 1 Questions	13
2 Road Map to Services	15
Terminology	16
Oracle Support Services	18
Logging TARs with OSS	
(the Old-Fashioned Way)	20
Providing Documentation to Support Your TAR	21
MetaLink	23
The Technical Libraries	24
The Forums	28
/Tars	30
Client Tombstone Information	32
Brief TAR Description	32
Oracle Technology Network	35

Locks	82
Latches	83
So, You're the New Oracle9i Database	84
Chapter 3 Questions	86

PART II

So You've Just Started?

4 Database Objects	89
Terminology	90
Tables—Where Your Data Is Stored	91
create table, an Example	92
create table as, an Example	93
Views—Customized Selections of One or More Tables	94
create view, an Example	94
Materialized Views—The View That Stores Data	95
create materialized view (Formerly snapshot), an Example	95
Query Rewrite	96
Indexes—A Fast Way to Get at Your Data	96
Advantages of Presorted Order	97
Unique and Non-unique Indexes	97
The 95/5 Rule	98
The Bitmap Index—An Index for Low Variations of Distinct Rows	98
Triggers—Event-Driven Programs	99
create trigger, an Example	99
Synonyms—Object Nicknames	101
create synonym, an Example	102

Sequences—A Fast Way to Obtain a Unique Number	102
create sequence, an Example	103
create role—A Way to Manage Privileges	103
create role, an Example	103
Functions, Procedures, and Packages	104
create function	104
create procedure	105
create package	106
Other Database Objects	107
create operator	107
create directory	108
create library	108
Database Links	108
create cluster	110
Chapter 4 Questions	111
5 SQL*Plus 101	113
How to Access SQL*Plus	114
Access from the Command Line	115
Icon-Based Access	116
Ending Your SQL*Plus Session	116
Data Definition Language (DDL)	116
create/drop Statement	117
Data Types	118
The describe Command	118
Not Null	120
Data Manipulation Language (DML)	120
The insert Statement	121
The select Statement	122
The SQL*Plus Environment	128
Joining Tables	133
Primary Keys and Foreign Keys	133
The break on Clause	135
Using break on with the skip Option	136
Computing Column Values at Break	137
break on report	138
Chapter 5 Questions	140
6 PL/SQL 101	141
Terminology	143
PL/SQL: The Oracle Programming Language	144
PL/SQL Character Set	146
Supported Characters	146
Arithmetic Operators and Relational Operators	147

PL/SQL Structure	147
PL/SQL Variables	149
Control Structures	152
if Logic Structures	154
case Expressions	156
Loops	158
SQL in Your PL/SQL Programs	160
Cursors	161
The Cursor for Loop	163
Exception Handling	165
Stored Procedures and Functions	167
Stored Procedures	167
Functions	171
Basic Debugging	173
Moving On	174
Chapter 6 Questions	175
7 DBA 101	177
Terminology	178
What Is a Database?	179
What Is an Oracle Instance?	180
The System Global Area (SGA)	180
Oracle Background Processes	181
startup open	182
shutdown	184
The Oracle Tablespace	186
Create Tablespace—extent management dictionary	186
Create Tablespace—extent management local autoallocate	187
create undo tablespace	188
alter tablespace add data file	188
alter tablespace offline	189
Drop a Tablespace	189
Rollback Segments	190
create rollback segment	190
alter rollback segment online	192
Shrinking a Rollback Segment Manually	192
drop rollback segment	193
Redo Logs	193
Multplexed Redo Logs	193
Dropping a Redo Log	194
Adding a Redo Log	195
Control Files—The Database Safety Checklist	196
How Control Files Are Created	196

Creating a User Account	197
grant connect, resource	197
Chapter 7 Questions	198

PART III Beyond the Basics

8 More SQL*Plus	203
Terminology	204
Deploying SQL*Plus in Production	205
Commenting Your Code with rem, --, and /*...*/	205
SQL*Plus Include Files	206
union, intersect, and minus Set Operators	209
union Operator	210
union all Operator	210
minus Operator	211
intersect Operator	211
Don't Mix Apples with Oranges	211
SQL*Plus Command-Line Editing	212
Using the Command-Line Editor	212
If Only I Could Use VI or Emacs	213
Dual Table	213
Oracle Functions	214
Math Functions and Operators	214
String Functions	216
The Date Data Type	219
Date Functions in SQL*Plus	220
group by Functions	225
Using group by to Find Duplicate Data	228
Using group by to Delete Duplicate Data	229
SQL Generating SQL	231
SQL Creating a Data File	232
Query Within a Query	233
The Decode Statement	236
update with decode Statement	237
Chapter 8 Questions	238
9 More PL/SQL	241
Terminology	242
Packages and Program Overloading	243
Advanced Error Handling in PL/SQL	244
User-Defined Exceptions	245
Oracle-Supplied Variables for Error Handling	246

Autonomous Transactions	248
PL/SQL Security with Invoker Rights	249
Oracle-Supplied Packages	250
utl_file Package	250
Dynamic SQL	254
Chapter 9 Questions	257
10 More DBA	259
Terminology	260
Backup and Recovery	261
Export	261
Export's Role in Backups	261
Parameters Used with Export	262
Export Modes of Operation	263
Types of Exports	269
Import	269
Import's Role in Recovery	270
Parameters Used with Import	270
Import Modes of Operation	271
Types of Imports	273
Media Recovery Features	274
Hot and Cold Backups	275
Running in Archivelog Mode	276
Writing a Hot Backup	279
Media Recovery—An Example	279
Chapter 10 Questions	283
11 Oracle Enterprise Manager	285
Terminology	286
What Can Be Done with OEM: A Quick Tour	287
Startup	290
Shutdown	293
Tablespace Maintenance	295
Resizing a Data File	298
Adding a Data File	298
Shrinking a Data File	299
User Maintenance	300
Creating a New User	301
Rights to Occupy Space in the Database	303
Granting Object Privileges	304
Object Maintenance	307
Object Maintenance Using SQL*Plus Worksheet	309
Chapter 11 Questions	312

12 Distributed Computing	315
Terminology	316
Partitioning Applications via Distributed Processing	317
Oracle Net	318
listener.ora	318
tnsnames.ora	320
The Network Configuration Assistant	322
Placement of tnsnames.ora	326
Establishing a Connection via Oracle Net	327
Chapter 12 Questions	329

PART IV

/ Is for Internet

13 The i in Oracle9i	333
Terminology	334
The Oracle Internet Database	336
Communicating with the Database	338
Java in the Database	340
High Availability	342
Protection from System Crashes	342
Protection from Disk Failures	343
Protection from Human Errors	343
Management of Planned Outages	344
Real Application Clusters	345
The Internet File System (IFS)	346
Chapter 13 Questions	347
14 All Things WWW	349
Terminology	350
The Oracle9i Application Server	352
Communication Services	355
Business Logic Services	357
Presentation Services	358
Caching Services	362
Content Management Services	364
Portal Services	364
Business Intelligence Services	366
Java for the Database	367
Questions for Chapter 14	370

PART V

Who Said You Were a Beginner?

15 Forms and Reports Overview	375
Terminology	376
Sample Data	376
Introduction to Forms and Reports	378
Forms and Reports Components	378
Initiating a Database Connection	378
Building a Form	380
The Data Block Wizard	382
The Layout Wizard	384
Editing an Existing Form	386
Report Builder	394
The Report Wizard	394
Modifying the Report	398
Chapter 15 Questions	399
16 Partitioning Data	401
Terminology	402
Why Partition Your Data?	403
Volume of Data	403
Ease of Management Offered by Partitioning	405
Performance Benefits	405
Range-Based Partitioning	406
Choosing a Partition Key	406
Range-Based Partitioning—The SQL	409
Indexing Partitioned Tables	411
Local Partitioned Indexes	412
Global Partitioned Indexes	415
To Local or Not to Local, That Is the Question	417
Prefixed and Non-prefixed Partitioned Indexes	420
List Partitioning	421
Hash Partitioning	423
Which Approach to Use When	424
Row Count	424
Access Method	425
Composite Partitioning—A Hybrid	427
Chapter 16 Questions	429
