About the Author

Bill McCarty has written more than ten programming books, on topics including Java, distributed computing, C++, and Linux, and is a contributing editor for *Linux Magazine*, for which he writes a monthly column. He is Associate Professor of Web and Information Technology in the School of Business and Management at Azusa Pacific University, Azusa, California, where he taught for seven years in that school's M.S. Applied Computer Science program. Bill earned a PhD in Management of Information Systems at the Claremont Graduate University, Claremont, California and has worked for fifteen years as a software developer and manager. He currently resides in La Habra, California with his family.

Contents

ACKNOWLEDGMENTS	xvii
INTRODUCTION	xix

PART 1

Writing Basic PHP Programs

1 Creating PHP Programs	3
Creating a PHP Script	4
Writing PHP Scripts	4
Writing the PHP Code Skeleton	4
Creating Output for a Web Browser	6
Documenting a PHP Script	8
Executing a PHP Script	10
Uploading a PHP Script	10
Executing a Script	13
Project 1-1: A First PHP Script	13
Troubleshooting a Script	14
Mastery Check	17
2 PHP Building Blocks	19
Numbers and Strings	20
Numbers	20
Strings	21

Literals and Variables	23
Project 2-1: Viewing the Values of PHP Variables	26
Scalars and Arrays	27
Operators and Functions	29
Operators	29
Functions	32
Project 2-2: A Calculation in PHP	34
Mastery Check	35
3 Creating HTML Forms	37
Form Design Basics	38
Designing a Form	38
Creating an HTML Form	39
Project 3-1: Viewing Form Fields	44
Creating Form Controls	45
Creating Customized Text Boxes	46
Creating Text Areas	46
Creating Password Boxes	47
Creating Check Boxes	47
Creating Radio Buttons	48
Creating Selects	48
Creating Hidden Fields	49
Project 3-2: An HTML Busy Box	52
More on Submitting a Form	56
Using an Image to Submit Data	56
Creating a Reset Button	57
Creating a Multi-Form Page	57
Using a Link to Provide Data to a Script	58
Project 3-3: A Multi-Form HTML Page	61
Mastery Check	64
4 Accessing Data	65
Getting and Using Data from a Form	66
Sending Output to the Browser	68
Constructing Strings that Embed Values of Variables	70
Project 4-1: The E-mail Address Books	71
Project Goals	71
Getting and Using Data from an Environment Variable	73
Project 4-2: Viewing Environment Variables	77
Project Goals	77
Mastery Check	78

5	Working with Scalar Values	79
	Working with Constants and Dynamic Variables	80
	Working with Constants	80
	Working with Dynamic Variables	81
	Working with Types	83
	Automatic Type Conversion	83
	Manual Type Conversion	84
	Project 5-1: A Simple Calculator	87
	Project 5-2: A Date Calculator	89
	Project 5-3: A News Story Generator	92
	Mastery Check	96

PART 2

Writing More Advanced PHP Programs

6	Writing Conditional Statements	99
	Using True/False Values	100
	Writing Simple if Statements	104
	Project 6-1: Testing Numeric Values	105
	Writing More Sophisticated if Statements	107
	Writing switch, break, and default Statements	110
	Writing for Statements	113
	Writing while and do while Statements	115
	Project 6-2: Validating User Input	118
	Mastery Check	125
7	Using Functions	127
	Using a Function	128
	Using Included Files	129
	Defining a Function	131
	Calling a User-Defined Function	132
	Terminating Function Execution	133
	Recursive Functions	133
	Defining Default Arguments	134
	PHP Variables and References	136
	Using Global Variables	136
	Using Local and Static Variables	137
	Using References (PHP4)	139
	Project 7-1: The Contact Form Revisited	141
	Mastery Check	148

	149
8 Using Arrays	150
Creating Arrays	150
Creating an Array Using Assignment	152
Using the array() Function	154
Iterating Through an Array	155
Iterating Through a Sequential Array	155
Searching a Sequential Array	156
The break Statement	157
The continue Statement	158
Iterating Through a Non-Sequential Array	160
Working with List Functions	161
The key() Function	161
The each() Function	162
The list() Function	164
Sorting Arrays	166
Project 8-1: The Contact Form Revisited	170
Mastery Check	171
9 Using Strings	172
Creating and Displaying Strings	172
Additional Escape Sequences	174
Working with ASCII Codes	175
Single-quoted Strings	176
Creating Formatted Output	180
Manipulating Strings	180
Getting the Length of a String	180
Trimming a String	182
Converting Strings to All Upper- or Lowercase	183
Comparing and Searching Strings	183
Comparing Strings	185
Finding and Extracting Substrings	187
Replacing a Substring	188
Matching Characters	192
Project 9-1: A Regular Expression Matcher	192
Project Goals	196
Mastery Check	

PART 3

Working with Stored Data

10 Using Cookies	199
Accessing and Creating Cookies	200
Accessing a Cookie	200

Creating a Cookie	201
Deleting a Cookie	203
Advanced Cookie Techniques	203
Storing Multiple Values in a Cookie	203
Specifying Access to a Cookie and Other Options	205
Project 10-1: A Login Page	207
Mastery Check	210
11 Working with Files and Directories	211
The Unix File System	212
Working with Unix Files	212
Working with Unix Directories	221
Working with Files	225
Ownership and Privilege Issues	226
Obtaining a File's Attributes	227
Changing File Privileges	229
Changing File Ownership	230
Opening a File	230
Verifying Completion of a File Operation	232
Closing a File	233
Reading from a File	234
Navigating a File	237
Writing to a File	239
Project 11-1: A Page Hit Counter	240
Getting Exclusive Access to a File	242
Project 11-2: An Improved Page Hit Counter	244
Copying a File	246
Renaming a File	247
Deleting a File	247
Working with Directories	250
Getting and Changing the Working Directory	250
Manipulating Paths	250
Viewing and Changing Directory Privileges	251
Reading Directory Contents	252
Creating a Directory	253
Deleting a Directory	253
Project 11-3: An Address Book Browser	254
Mastery Check	259
12 Sending and Receiving E-mail	261
Sending E-mail	262
Project 12-1: A Form Submission Script	263
Project Goals	264

Receiving E-mail	267
Opening a Mailbox	269
Switching Folders	271
Closing a Mailbox	271
Getting Information about a Mailbox	274
Getting a List of Messages	275
Working with Message IDs	275
Getting Information about a Message	276
Getting a Message Body	277
Getting Message Headers	279
Marking a Message for Deletion	281
Project 12-2: An E-mail Browser	281
Project Goals	286
Manipulating Folders	287
Listing Existing Folders	287
Creating a Folder	288
Renaming a Folder	288
Deleting a Folder	289
Copying Messages to a Folder	290
Moving Messages to a Folder	291
Mastery Check	291
13 Relational Database and SQL Primer	293
Relational Database Concepts	294
Structure of a Relational Database	294
Rationale for Relational Databases	296
Facilitating Sharing of Data	296
Providing Data Independence	297
Ad Hoc Querying	297
Organizing Data	298
Securing Data	298
Minimizing Necessary Programmer Expertise	298
Achieving Computational Efficiency	298
Deciding When to Use a Relational DBMS	299
Database Implementation	300
Database Design	300
E-R Modeling	300
Database Normalization	304
Refinement of E-R Models	307
MySQL Database Creation	309
Accessing Database Data: SQL Queries	314
Changing Database Data	318

Sorting, Aggregating, and Grouping	322
Expressions and Functions	325
Joins	329
Project 13-1: Working with SQL	331
Mastery Check	335

PART 4

Using Advanced PHP Facilities

14 Accessing Relational Databases	339
Using MySQL Databases	340
Connecting to the MySQL Server	340
Selecting the Database	342
Checking for Errors	342
Suppressing Unwanted Errors and Warnings	343
Closing the MySQL Server Connection	344
Performing UPDATE, INSERT, and DELETE Queries	345
The <code>mysql_query()</code> Function	346
Checking Queries That Do Not Return Table Rows	346
Using <code>Auto_Increment</code> Table Columns	347
Processing the Results of SELECT Queries	349
Working with Resultsets	354
Obtaining the Number of Resultset Columns	354
Obtaining the Name of a Resultset Column	354
Obtaining the Length of a Resultset Column	355
Obtaining the MySQL Flags Associated with a Resultset Column ..	355
Obtaining the MySQL Type of a Resultset Column	356
Determining the MySQL Table Associated with a Resultset Column ..	357
Obtaining the Complete Resultset Structure	357
Accessing Resultset Columns Non-sequentially	359
Exploring the DBMS	360
Determining the Databases Hosted by a Server	361
Determining the Tables Contained Within a Database	362
Determining the Columns Contained Within a Table	363
Quotes and Magic Quotes	365
Magic Quotes	366
Escaping and Unescaping	367
Escaping HTML Text	367
Escaping URLs	369
Other PHP Data Management Facilities	370
Postgresql	370
ODBC	371

	LDAP	372
	XML	372
	Project 14-1: An Address Book Browser	374
	Mastery Check	380
15	Using Classes and Objects	381
	Introduction to Object-oriented	382
	Classes	383
	Inheritance	384
	Defining and Instantiating a Class	386
	Instantiating an Object	387
	Defining a Constructor	388
	Using Inheritance	390
	Overriding Methods	391
	Invoking an Overridden Method	393
	Object Arrays	395
	Project 15-1: Working with Objects	397
	Mastery Check	401
16	Using Application Templates	403
	Introduction to Templates	404
	Using a Template	405
	Creating the Template File	406
	Instantiating a FastTemplate Object	406
	Associating a Template Variable with the Template File	407
	Assigning Values to the Template Variables	407
	Parsing the Template Variable Associated with the Template File ..	408
	Printing the Template Variable Containing the Result	408
	Constructing a Complete Web Site	408
	Project 16-1: Working with Templates	410
	Mastery Check	415
17	Debugging PHP Scripts	417
	Debugging and Common Programming Errors	418
	Understanding Bugs	419
	Syntax Errors	420
	Run-time Error Messages	421
	Incorrect or Missing Output	423
	Error Message Management in PHP	424
	Avoiding Error Messages	424
	Suppressing Error Messages	425
	Logging Error Messages	426

The Art and Practice of Debugging	429
Reproducing the Symptom	430
Pinpointing the Bug	430
Understanding the Bug	432
Fixing the Bug	432
Testing the Program	433
Project 17-1: PHP Error Messages	434
Mastery Check	437

PART V

Appendixes

A Answers to Mastery Checks	441
Module 1: Creating PHP Programs	442
Module 2: PHP Building Blocks	442
Module 3: Creating HTML Forms	443
Module 4: Accessing Data	444
Module 5: Working with Scalar Values	445
Module 6: Writing Conditional Statements	446
Module 7: Using Functions	447
Module 8: Using Arrays	448
Module 9: Using Strings	449
Module 10: Using Cookies	449
Module 11: Working with Files and Directories	450
Module 12: Sending and Receiving E-mail	451
Module 13: Relational Database and SQL Primer	452
Module 14: Accessing Relational Databases	452
Module 15: Using Classes and Objects	453
Module 16: Using Application Templates	454
Module 17: Debugging PHP Scripts	455
B Installing PHP	457
Red Hat Linux 7.1	458
Installing Apache	458
Installing PHP	458
Installing MySQL	459
Installing IMAP	459
Configuring MySQL	460
Starting the Apache Service	460
Testing the Installation	461
Other Linux and Unix Releases	462
Windows NT/2000 and 95/98	463
Apache	464
IIS	464

	464
PWS	464
PHP	465
C PHP Resources	466
Web Sites	467
Mailing Lists	467
Newsgroups	469
D Unix Essentials	470
Basic Unix Concepts	470
Files	471
Directories	471
Paths	473
User Accounts	474
User Groups	474
Ownership and Permissions	475
Basic Unix Techniques	476
Logging In and Out	477
Issuing a Unix Command	477
Changing Your Password	478
Seeing Who's Logged in	478
Checking Whether a Host Is Alive	479
Reading and Sending E-Mail	479
Changing the Current Working Directory	480
Viewing Directory Contents	481
Viewing File Contents and Command Output	482
Editing a File	482
Creating a Directory	482
Deleting a File	483
Deleting a Directory	483
Copying a File or Directory	484
Renaming a File or Directory	484
Shell Metacharacters and Name Globbing	484
Consulting Online Unix Documentation	485
Reporting Disk Space Usage	485
Setting File Ownership	486
Setting File Permissions	486
Finding a File	487
Finding a File Containing Specified Text	488
Determining the Type of a File	489
Comparing Text Files	489
Working with Compressed Files	489
Working with Tarballs	490
Transferring Files to and from Remote Hosts	491

E	Escapes	493
F	ASCII	495
G	PHP Operators	501
H	Security	505
	Threats and Risks	506
	Countermeasures	508
	Authenticating and Authorizing Users	508
	Distrusting User Input	508
	Employing Cryptographic Measures	509
	Properly Configuring Servers	509
	Securing Databases	509
	Resources	510
I	PHP Functions	511
	Array Functions	513
	Aspell Functions	515
	Calendar Functions	516
	Class/Object Functions	516
	Character type Functions	517
	Date and Time Functions	518
	Directory Functions	518
	Error Handling and Logging Functions	519
	Filesystem Functions	519
	FTP Functions	522
	HTTP Functions	523
	IMAP, POP3 and NNTP Functions	524
	Mail Functions	527
	Mathematical Functions	527
	Miscellaneous Functions	529
	MySQL Functions	530
	Output Control Functions	533
	PHP options & information	533
	Program Execution Functions	535
	POSIX Functions	535
	POSIX Extended Regular Expression Functions	537
	Session Handling Functions	537
	String Functions	538
	URL Functions	542
	Variable Functions	542
	Index	545
