Preface

Key Changes in the Fourth Edition	xiii
Book Organization	xiii
Hallmark Features of the Text	xiv
Acknowledgments	xviii
My Story	xxv

0

Introduction to Computers and Programming Languages

1

0.1 A History of Computers	2
0.2 Computer Architecture	4
0.3 Programming Languages	10
0.4 Java	12
Summary	12
Key Concepts	13
Exercises	13

1

Introduction to Object-Oriented Programming and Software Development

15

1.1 Classes and Objects	16
1.2 Messages and Methods	18
1.3 Class and Instance Data Values	20
1.4 Inheritance	23

1.5	Software Engineering and Software Life Cycle	25
	Summary	27
	Key Concepts	27
	Exercises	28

2 Getting Started with Java 31

2.1	The First Java Program	32
2.2	Program Components	41
2.3	Edit-Compile-Run Cycle	51
2.4	Sample Java Standard Classes	54
2.5	Sample Development	67
	Summary	74
	Key Concepts	75
	Exercises	75

3 Numerical Data 81

3.1	Variables	82
3.2	Arithmetic Expressions	90
3.3	Constants	95
3.4	Getting Numerical Input Values	97
3.5	Standard Output	102
3.6	Standard Input	106
3.7	The Math Class	113
3.8	Random Number Generation	117
3.9	The GregorianCalendar Class	119
3.10	Sample Development	124
3.11	Numerical Representation (<i>Optional</i>)	136
	Summary	139
	Key Concepts	140
	Exercises	140

4 Defining Your Own Classes—Part 1 151

4.1	First Example: Defining and Using a Class	152
4.2	Second Example: Defining and Using Multiple Classes	162
4.3	Matching Arguments and Parameters	166

4.4	Passing Objects to a Method	168
4.5	Constructors	173
4.6	Information Hiding and Visibility Modifiers	178
4.7	Class Constants	181
4.8	Local Variables	189
4.9	Calling Methods of the Same Class	191
4.10	Changing Any Class to a Main Class	195
4.11	Sample Development	196
	Summary	211
	Key Concepts	212
	Exercises	212

5

Selection Statements

219

5.1	The if Statement	220
5.2	Nested if Statements	231
5.3	Boolean Expressions and Variables	237
5.4	Comparing Objects	245
5.5	The switch Statement	250
5.6	Drawing Graphics	254
5.7	Sample Development	264
	Summary	287
	Key Concepts	288
	Exercises	288

6

Repetition Statements

297

6.1	The while Statement	298
6.2	Pitfalls in Writing Repetition Statements	307
6.3	The do-while Statement	312
6.4	Loop-and-a-Half Repetition Control	316
6.5	Confirmation Dialog	320
6.6	The for Statement	321
6.7	Nested for Statements	326
6.8	Formatting Output	329
6.9	Loan Tables	334
6.10	Estimating the Execution Time	336
6.11	(Optional) Recursive Methods	340

	345
6.12 Sample Development	355
Summary	356
Key Concepts	356
Exercises	

7 Defining Your Own Classes—Part 2 367

7.1 Returning an Object From a Method	368
7.2 The Reserved Word this	372
7.3 Overloaded Methods and Constructors	380
7.4 Class Variables and Methods	385
7.5 Call-by-Value Parameter Passing	389
7.6 Organizing Classes into a Package	396
7.7 Using Javadoc Comments for Class Documentation	397
7.8 The Complete Fraction Class	402
7.9 Sample Development	410
Summary	428
Key Concepts	429
Exercises	429

8 Exceptions and Assertions 437

8.1 Catching Exceptions	438
8.2 Throwing Exceptions and Multiple catch Blocks	444
8.3 Propagating Exceptions	449
8.4 Types of Exceptions	457
8.5 Programmer-Defined Exceptions	460
8.6 Assertions	462
8.7 Sample Development	469
Summary	482
Key Concepts	483
Exercises	483

9 Characters and Strings 487

9.1 Characters	488
9.2 Strings	491
9.3 Pattern Matching and Regular Expression	502

9.4	The Pattern and Matcher Classes	509
9.5	Comparing Strings	513
9.6	StringBuffer and StringBuilder	515
9.7	Sample Development	521
	Summary	534
	Key Concepts	535
	Exercises	535

10 Arrays 543

10.1	Array Basics	544
10.2	Arrays of Objects	555
10.3	Passing Arrays to Methods	565
10.4	Two-Dimensional Arrays	572
10.5	Lists and Maps	579
10.6	Sample Development	589
	Summary	606
	Key Concepts	607
	Exercises	607

11 Sorting and Searching 613

11.1	Searching	614
11.2	Sorting	618
11.3	Heapsort	626
11.4	Sample Development	639
	Summary	659
	Key Concepts	660
	Exercises	660

12 File Input and Output 663

12.1	File and JFileChooser Objects	664
12.2	Low-Level File I/O	673
12.3	High-Level File I/O	678
12.4	Object I/O	687

	694
12.5 Sample Development	702
Summary	703
Key Concepts	703
Exercises	

13 Inheritance and Polymorphism 709

13.1 Defining Classes with Inheritance	710
13.2 Using Classes Effectively with Polymorphism	714
13.3 Inheritance and Member Accessibility	717
13.4 Inheritance and Constructors	722
13.5 Abstract Superclasses and Abstract Methods	726
13.6 Inheritance versus Interface	731
13.7 Sample Development	732
Summary	753
Key Concepts	753
Exercises	753

14 GUI and Event-Driven Programming 757

14.1 Customizing Frame Windows	760
14.2 GUI Programming Basics	766
14.3 Text-Related GUI Components	776
14.4 Layout Managers	787
14.5 Effective Use of Nested Panels	795
14.6 Other GUI Components	805
14.7 Menus	823
14.8 Handling Mouse Events	827
Summary	835
Key Concepts	837
Exercises	837

15 Recursive Algorithms 847

15.1 Basic Elements of Recursion	848
15.2 Directory Listing	849

15.3	Anagram	851
15.4	Towers of Hanoi	854
15.5	Quicksort	856
15.6	When Not to Use Recursion	861
	Summary	863
	Key Concepts	864
	Exercises	864

A	How to Run Java Programs	867
----------	--------------------------	-----

B	Sample Programs	875
----------	-----------------	-----

C	Standard Classes and Interfaces	897
----------	---------------------------------	-----

D	UML Diagrams	919
----------	--------------	-----

Index		927
--------------	--	-----
