Who Was Ferdinand Magellan?

Imagine a time when no one was sure the Earth was round . . . when people believed they'd topple over the edge if they sailed too far from home. Imagine a time when most people didn't know there was a Pacific Ocean. Go back five hundred years, when whole continents were still undiscovered, when people thought the Earth was tiny and that monsters swam through its waters. Yet one man decided to sail his ship through unknown seas and discover what was out there.
