ACKNOWLEDGMENTS

To borrow a phrase, writing a finance textbook is easy—all you do is sit down at a word processor and open a vein. We never would have completed this book without the incredible amount of help and support we received from our colleagues, students, editors, family members, and friends. We would like to thank, without implicating, all of you.

Clearly, our greatest debt is to our many colleagues (and their students) who, like us, wanted to try an alternative to what they were using. Needless to say, without this support, we would not be publishing this text.

To the following reviewers, then, we are grateful for their many contributions:

Dean Baim, *Pepperdine University*

William Chittenden, *Texas State University*

Louis C. Gasper, *University of Dallas*

Louis Gingerella, *Rensselaer at Hartford*

Edward Harding, *Plymouth State University*

Brett A. King, *University of North Alabama*

Dr. Phillip T. Kolbe, *University of Memphis*

Yulong Ma, *California State University-Long Beach*

Edward Morris, *Lindenwood University*

Jeryl L. Nelson, *Wayne State College*

Srinivas Nippani, *Texas A&M University-Commerce*

Dr. Vivek Pandey, *University of Texas at Tyler*

Janet Payne, *Texas State University*

Wayne Price, *Golden Gate University-San Francisco*

William A. Reese, Jr., *Tulane University*

Mark Sunderman, *University of Wyoming*

Mahmoud Wahab, *University of Hartford*

Joseph Vu, *DePaul University*

We owe a special thanks to Steven Dolvin, Butler University. Steve worked on many of the supplements that accompany this book, including the Instructor's Manual and the Instructor PowerPoint Presentation.

We also thank Joseph Smolira of Belmont University for his work on this book. Joe worked closely with us to

develop portions of the Instructor's Manual, along with the many vignettes and real-world examples. In addition, we would like to thank Kay Johnson, Penn State University-Erie, for creating the self-study questions on the OLC, as well as the Student PowerPoints.

We would also like to thank Charles Bebrowsky, University of Kentucky; Lei Wen, Buena Vista University; Linda De Angelo, Dennis Draper, Kim Dietrich, Harry De Angelo, Aris Protopapadakis, Suh-Pyng Ku, and Mark Westerfield, all of the Marshall School of Business at the University of Southern California; and Jordan Strauss Esq.; and Michael Griffin, University of Massachusetts-Dartmouth, for their contributions to this edition. We also owe a debt of gratitude to Edward I. Altman of New York University; Robert S. Hansen of Virginia Tech; and Jay Ritter of the University of Florida, who have provided many thoughtful comments and immeasurable help.

The following University of Kentucky doctoral students did outstanding work on this edition: Evgenia Dyshlyuk, Hinh Khieu, Jim Wolin, Jon Fulkerson, and Pankaj Maskara. To them fell the unenviable task of technical proofreading, and in particular, careful checking of each calculation throughout the text and Instructor's Manual.

Finally, in every phase of this project, we have been privileged to have had the complete and unwavering support of a great organization, McGraw-Hill/Irwin. We especially thank the McGraw-Hill/Irwin sales organization. The suggestions they provide, their professionalism in assisting potential adopters, and the service they provide have been a major factor in our success.

We are deeply grateful to the select group of professionals who served as our development team on this edition: Michele Janicek, Senior Sponsoring Editor; Jennifer Rizzi, Development Editor II; Rhonda Seelinger, Executive Marketing Manager; Julie Phifer, Marketing Manager; Christine Vaughan, Lead Project Manager; Kami Carter, Senior Designer; and Rose Hepburn, Lead Production Supervisor. Others at McGraw-Hill/Irwin, too numerous to list here, have improved the book in countless ways.

Finally, we wish to thank our families, Carol, Kate, Jon, Jan, Mark, Lynne, and Susan, for their forbearance and help.

Throughout the development of this edition, we have taken great care to discover and eliminate errors. Our goal is to provide the best textbook available on the subject. To ensure that future editions are error-free, we gladly offer \$10 per arithmetic error to the first individual reporting it as a modest token of our appreciation. More than this, we would like to hear from instructors and students alike. Please write and

tell us how to make this a better text. Forward your comments to: Dr. Brad Jordan, c/o Editorial-Finance, McGraw-Hill/Irwin, 1333 Burr Ridge Parkway, Burr Ridge, IL 60527 or visit us online at www.mhhe.com/rwj.
