About the Author

Prateek Joshi is an artificial intelligence researcher, published author of five books, and TEDx speaker. He is the founder of Pluto AI, a venture-funded Silicon Valley startup building an analytics platform for smart water management powered by deep learning. His work in this field has led to patents, tech demos, and research papers at major IEEE conferences. He has been an invited speaker at technology and entrepreneurship conferences including TEDx, AT&T Foundry, Silicon Valley Deep Learning, and Open Silicon Valley. Prateek has also been featured as a guest author in prominent tech magazines.

His tech blog (www.prateekjoshi.com) has received more than 1.2 million page views from 200 over countries and has over 6,600+ followers. He frequently writes on topics such as artificial intelligence, Python programming, and abstract mathematics. He is an avid coder and has won many hackathons utilizing a wide variety of technologies. He graduated from University of Southern California with a master's degree specializing in artificial intelligence. He has worked at companies such as Nvidia and Microsoft Research. You can learn more about him on his personal website at www.prateekj.com.

About the Reviewer

Richard Marsden has over 20 years of professional software development experience. After starting in the field of geophysical surveying for the oil industry, he has spent the last ten years running the Winwaed Software Technology LLC independent software vendor. Winwaed specializes in geospatial tools and applications including web applications, and operates the <http://www.mapping-tools.com> website for tools and add-ins for geospatial applications such as Caliper Maptitude and Microsoft MapPoint.

Richard was also a technical reviewer of the following Packt publications: *Python Geospatial Development* and *Python Geospatial Analysis Essentials*, both by Erik Westra; *Python Geospatial Analysis Cookbook* by Michael Diener; *Mastering Python Forensics* by Drs Michael Spreitzenbarth and Dr Johann Uhrmann; and *Effective Python Penetration Testing* by Rejah Rehim.

Did you know that Packt offers eBook versions of every book published, with PDF and ePub files available? You can upgrade to the eBook version at www.PacktPub.com and as a print book customer, you are entitled to a discount on the eBook copy. Get in touch with us at service@packtpub.com for more details.

At www.PacktPub.com, you can also read a collection of free technical articles, sign up for a range of free newsletters and receive exclusive discounts and offers on Packt books and eBooks.

<https://www.packtpub.com/mapt>

Get the most in-demand software skills with Mapt. Mapt gives you full access to all Packt books and video courses, as well as industry-leading tools to help you plan your personal development and advance your career.

Why subscribe?

- Fully searchable across every book published by Packt
- Copy and paste, print, and bookmark content
- On demand and accessible via a web browser

Customer Feedback

Thank you for purchasing this Packt book. We take our commitment to improving our content and products to meet your needs seriously—that's why your feedback is so valuable. Whatever your feelings about your purchase, please consider leaving a review on this book's Amazon page. Not only will this help us, more importantly it will also help others in the community to make an informed decision about the resources that they invest in to learn.

You can also review for us on a regular basis by joining our reviewers' club. **If you're interested in joining, or would like to learn more about the benefits we offer, please contact us:** customerreviews@packtpub.com.

Table of Contents

Preface	1
Chapter 1: Introduction to Artificial Intelligence	7
What is Artificial Intelligence?	8
Why do we need to study AI?	8
Applications of AI	12
Branches of AI	14
Defining intelligence using Turing Test	16
Making machines think like humans	18
Building rational agents	20
General Problem Solver	21
Solving a problem with GPS	22
Building an intelligent agent	22
Types of models	24
Installing Python 3	24
Installing on Ubuntu	25
Installing on Mac OS X	25
Installing on Windows	26
Installing packages	26
Loading data	27
Summary	29
Chapter 2: Classification and Regression Using Supervised Learning	31
Supervised versus unsupervised learning	31
What is classification?	32
Preprocessing data	33
Binarization	33
Mean removal	34
Scaling	35
Normalization	36
Label encoding	37
Logistic Regression classifier	38
Naïve Bayes classifier	43
Confusion matrix	47
Support Vector Machines	50
Classifying income data using Support Vector Machines	52
