## ABOUT THE AUTHOR

NICE NADIM is an independent design developer at Clinton Center for the Arts. He is currently a graduate student at the College of Engineering, University of Denver, Colorado, where he is completing his master's thesis in 2008 with the title of "The Role of the Developer in the Design Process". He has been using every version of iOS through the years and has been a developer since 2003, starting with the developer community by speaking at numerous events at the iPhone Developer Conference, as well as helping sponsor events including the iPhone Developer Conference. He is also a member of the iPhone Developer Community.

*This book is dedicated to my mom, dad, and sister for always believing in me.*

# ABOUT THE AUTHOR

CREDITS

**NICK HARRIS** is an independent software developer at Clifton Garage Mobile LLC. After graduating from the Russ College of Engineering at Ohio University in 2001 with a Bachelor of Science degree in computer science, he relocated to Denver, Colorado, where he began his professional career. Nick began developing for iPhone in 2008 with the release of the iPhone SDK and has created and released more than a half dozen apps using every version of iOS through iOS 7. Along with his accomplishments as a developer, Nick enjoys giving back to the developer community by speaking at conferences such as the 360iDev Developer Conference, as well as helping sponsor events including iOSDevCamp Colorado. Contact Nick at [nick@cliftongarage.com](mailto:nick@cliftongarage.com).

# ACKNOWLEDGMENTS

**WHEN THE ORIGINAL IPHONE** was first released, I thought my friends who lined up and waited hours to buy one were crazy. Who would spend that much money on a phone? It wasn't until Apple announced the iPhone SDK that my mind began to change. Finally, I decided to take the plunge and headed to the local AT&T store. I felt guilty for spending so much money until I got home and started to actually use my new iPhone. I was amazed! I had to learn how to write my own apps.

Five years later I'm still amazed at the developer community that grew up around what has become iOS development. I have met so many great people who taught me not only how to create iOS apps but also how important it is to give back to the community. This book is partially to teach the next crop of iOS developers as well as to thank and honor all those who helped me along the way. There are too many to name individually and I would hate to miss someone, but you all know who you are.

I would also like to thank my acquisition editor, Mary James. I had always wanted to write a book but didn't know where to start. Mary was instrumental in getting the ball rolling and making this book a reality. Ami Sullivan, who was my project editor, also deserves a huge thank-you. Being a first-time author, I really had no idea what to expect. Ami has been a great coach, helping me get everything done well and on time while also helping encourage me to keep going when the work seemed overwhelming. Next, I'd like to thank my copy editor, San Dee Phillips, for catching all my grammatical errors and making sure the ideas I've tried to explain make sense.

I owe a big thank you to my technical editor, Kyle Richter, for finding all my technical errors and pointing out ways to make the code for this book easy to understand for all readers. Kyle also helped me put the original book proposal together and has given me extremely valuable advice. Many thanks.

Finally, a huge thank-you to my parents and sister for all their encouragement along the way. I don't think I could ever express how much I appreciate it.

Introduction	11
Part I: Getting Started	14
Summary	47
<b>CHAPTER 2: Creating a New iOS App</b>	51
Creating a New iOS App	51
Choosing Your Development Environment	54
Learning About Xcode's Interface	54
Exploring the Xcode Project Layout	55
Choosing the UI Kit Framework	56
Choosing the iOS Device	56
Adding a Label to a Storyboard	56

# CONTENTS

<b>INTRODUCTION</b>	<b>xix</b>
<b>CHAPTER 1: BUILDING A REAL-WORLD IOS APP: BANDS</b>	<b>1</b>
Introducing Bands	2
Getting Started	3
Scoping the App	4
Defining the Features	5
Creating a Development Plan	6
Summary	6
<b>CHAPTER 2: INTRODUCTION TO OBJECTIVE-C</b>	<b>9</b>
Exploring the History of Objective-C	9
Explaining the Basics	10
Learning About Objects and Classes	12
Instantiating Objects	16
Managing Memory	22
Introducing Automatic Reference Counting	26
Adding Properties to a Class	27
Explaining Strings	32
Using Basic Data Structures	35
Discussing Advanced Concepts	39
Explaining the Model-View-Controller Design Pattern	39
Learning About Protocols and Delegates	41
Using Blocks	44
Handling Errors	44
Summary	47
<b>CHAPTER 3: STARTING A NEW APP</b>	<b>51</b>
Creating a New App in Xcode	51
Discussing Xcode Templates	54
Learning About Bundle Identifiers	54
Exploring the Xcode Project Layout	55
Discussing the UIKit Framework	56
Discussing the Main Storyboard	56
Adding a Label to a Storyboard	56
