Warning and Disclaimer

This book is designed to provide information about CCNA 3: Switching Basics and Intermediate Routing and CCNA 4: WAN Technologies of the Cisco Networking Academy Program CCNA course. Every effort has been made to make this book as complete and as accurate as possible, but no warranty or fitness is implied.

The information is provided on an "as is" basis. The author, Cisco Press, and Cisco Systems, Inc. shall have neither liability nor responsibility to any person or entity with respect to any loss or damages arising from the information contained in this book or from the use of the discs or programs that may accompany it.

The opinions expressed in this book belong to the author and are not necessarily those of Cisco Systems, Inc.

This book is part of the Cisco Networking Academy® Program series from Cisco Press. The products in this series support and complement the Cisco Networking Academy Program curriculum. If you are using this book outside the Networking Academy program, then you are not preparing with a Cisco trained and authorized Networking Academy provider.

Feedback Information

At Cisco Press, our goal is to create in-depth technical books of the highest quality and value. Each book is crafted with care and precision, undergoing rigorous development that involves the unique expertise of members from the professional technical community.

Readers' feedback is a natural continuation of this process. If you have any comments regarding how we could improve the quality of this book, or otherwise alter it to better suit your needs, you can contact us through e-mail at networkingacademy@ciscopress.com. Please make sure to include the book title and ISBN in your message.

We greatly appreciate your assistance.

About the Technical Reviewers

Ronald Bodtcher has been involved with computer networking since college, where he implemented a primitive version of SneakerNet while programming an IBM-360 with punched cards. After graduating from BYU with bachelor's and master's degrees in accounting, Ron actually became a computer and worked as a manager and tax computer specialist for KPMG Peat Marwick. Today, Ron is a consultant for CPAide, a company that provides web services for accounting professionals. Ron is a certified public accountant, and his IT certifications include A+, Network+, and CCNA. He is also a member of the Internet Society, the Association for Computing Machinery, and the IEEE. As a graduate of the Cisco Networking Academy Program at College of the Canyons in Santa Clarita, California, Ron has first-hand experience in mastering basic Cisco Networking and passed the CCNA with flying colors. Ron spends his free time recovering and restoring Ice Age fossils in the paleontology lab at the LaBrea Tar Pits and hiking in Waterton National Park with his wife, Sara, and their three daughters Sara Jr., Alice, and Ronaleah.

K R. Kirkendall is a teacher at Boise State University in Boise, Idaho, has his B.A. degree in business administration from St. Leo College, and is working on his MIS degree at Boise State. At Boise State, K teaches Cisco, Microsoft, and network security courses. He has several industry certifications, including CCNP, CCNA, CCAI, CCDA, MCP, CNA, A+, Network+, and Server+. K and his wife Jeanine have five wonderful children and two super grandsons, Isaiah and Kdren. For the past five years, K has also worked for the Cisco Networking Academy in the assessment division, which writes questions for the Cisco Networking Academy Program and Cisco Certification exams.

Jim Lorenz is a senior technical writer and curriculum developer for the Cisco Networking Academy Program. He has more than 20 years of experience in information systems and has held various IT positions in Fortune 500 companies, including Honeywell and Motorola. Jim has developed and taught computer and networking courses for both public and private institutions for more than 15 years. He is also an editor for the Cisco Networking Academy Program Lab Companion manuals. Jim is a Certified Novell Netware Engineer (CNE), a Microsoft Certified Trainer (MCT), and a Cisco Certified Academy Instructor (CCAI). Jim earned his bachelor's degree in computer information systems from Prescott College.

Rick McDonald teaches computer and networking courses at the University of Alaska Southeast in Ketchikan, Alaska. He holds a B.A. degree in English and an M.A. degree in educational technology from Gonzaga University in Spokane, WA. His current project is developing methods for delivering hands-on training across the vast distances of the Alaska. Rick enjoys travel and hiking with his wife, Becky, his sons Greg, Paul, and Sam.

Overview

	Foreword	xxxiii
	Introductionxxxv
Part I	Review3
Chapter 1	Review: The OSI Reference Model and Routing5
Part II	CCNA 3: Switching Basics and Intermediate Routing43
Chapter 2	Introduction to Classless Routing45
Chapter 3	Single-Area OSPF77
Chapter 4	Enhanced Interior Gateway Routing Protocol115
Chapter 5	Switching Concepts and LAN Design147
Chapter 6	Switches209
Chapter 7	Switch Configuration237
Chapter 8	Spanning Tree Protocol273
Chapter 9	Virtual LANs303
Chapter 10	VLAN Trunking Protocol333
Part III	CCNA 4: WAN Technologies365
Chapter 11	Scaling IP Addresses367
Chapter 12	WAN Technologies405
Chapter 13	Point-to-Point Protocol463
Chapter 14	ISDN and DDR505
Chapter 15	Frame Relay549
Chapter 16	Introduction to Network Administration585

Part IV	CCNA Bonus Material	631
Chapter 17	Optical Networking Fundamentals	633
Chapter 18	Network Management	665
Chapter 19	Network+ Certification Exam Review	713
Chapter 20	CCNA Certification Exam Review	787
Chapter 21	Introduction to Converged Networking	851
Chapter 22	Developing Network Security and Network Management Strategies	869
Chapter 23	Virtual Private Networks	891
Part V	Appendixes	909
Appendix A	Glossary of Key Terms	911
Appendix B	Check Your Understanding Answer Key	939
Appendix C	Module–Chapter–Lab Guide	961
Index		967
