## Preface

Recently, with the success of Java and the existence of different interfaces between VRML and Java, it became possible to implement three-dimensional internet applications on standard VRML browsers (Plugins) using Java. With the widespread use of VRML-Browsers, e.g., as part of the Netscape Communicator and Microsoft's Internet Explorer standard distributions, everyone connected to the internet via a PC (and some other platforms) can directly enter a virtual world without installing a new kind of software. The VRML technology offers the basis for new forms of customer services, e.g., interactive three-dimensional product configuration, spare part ordering, or customer training. Also this technology can be used for CSCW in intranets.

This book has a theoretical and a practical part. The theoretical part is intended more for teachers and researchers, while the practical part is intended for web designers, programmers and students, who want to have both a hands-on approach to implementing Web 3D applications and a technically detailed overview of existing solutions for specific problems in this area.

The reader should have a good knowledge of programming languages and computers in general and should know Java or at least an object-oriented programming language. The book not only provides and explains source code, which can be used as a starting point for own implementations, but it also describes the fundamental problems and how currently known solutions work and discusses a variety of different techniques and trade-offs. Many illustrations help the reader to understand and memorize the underlying principles.

**Acknowledgments.** This book evolved from lectures at the University of Saarland and courses taught in industry. I want to thank all participants for discussions and feedback. Andreas Kerren carefully read a draft version of the book and provided constructive comments. Above all, I have to thank my wife Christine – she has been very patient with me. While I spent weekends in front of the computer, she had to take care of our two sons Luca and Jean-Luc. This book is dedicated to them.

Saarbrücken, January 2001

# Contents

---

## Part I. Introduction

---

<b>1. Motivation</b> .....	3
1.1 Peloton .....	3
1.2 A Virtual Theater .....	4
1.3 Electronic Commerce .....	5
<b>2. Technical Aspects</b> .....	7
2.1 Terminology .....	7
2.2 Requirements .....	8
2.3 Technologies, Languages and Protocols .....	9
<b>3. User Perspective</b> .....	11
3.1 Applications .....	11
3.2 Commercial and Experimental Virtual Worlds .....	11
3.3 Navigation .....	14
3.4 Communication .....	15
3.5 Multi-User Worlds – The Future?.....	16

---

## Part II. Fundamentals

---

<b>4. Three-Dimensional Computer Graphics</b> .....	19
4.1 Some Mathematical Preliminaries .....	19
4.2 The Graphics Pipeline .....	22
<b>5. Virtual Reality Modeling Language (VRML)</b> .....	27
5.1 History of VRML .....	27
5.2 What is VRML? .....	28
5.3 Concepts of VRML .....	28
5.4 VRML: An Example .....	29
5.5 Static Scenes .....	31
5.5.1 Geometric Nodes .....	31
5.5.2 Appearance .....	33
5.5.3 Transformations .....	34

5.5.4	Other Static Nodes .....	34
5.5.5	DEF/USE .....	35
5.5.6	Extensibility .....	36
5.6	Dynamic VRML .....	36
5.6.1	Events, Routes, Sensors and Interpolators .....	37
5.6.2	Script .....	41
5.6.3	Animations Using the External Authoring Interface ...	44
5.6.4	Problems with the EAI .....	49
5.7	Conclusion .....	49
<b>6.</b>	<b>Protocols for Distributed Virtual Worlds .....</b>	<b>51</b>
6.1	Internet Protocols – TCP/IP .....	51
6.1.1	Network Layer: Internet Protocol (IP) .....	52
6.1.2	Transport Layer: Transmission Control Protocol (TCP) .....	53
6.1.3	Transport Layer: User Datagram Protocol (UDP) ....	53
6.1.4	Transport Layer: Multicast IP .....	53
6.2	A Layer Model for Distributed Virtual Worlds .....	54
6.3	Architectures for Virtual Worlds .....	55
6.4	Behavior .....	55
6.5	Consistency .....	56
6.6	Protocols for Distributed Virtual Worlds .....	57
6.6.1	Distributed Interactive Simulation (DIS) .....	57
6.6.2	Distributed Worlds Transfer and Communication Protocol (DWTP) .....	60
6.6.3	The Multi-User 3D Protocol (Mu3D) .....	61
6.6.4	Virtual Reality Transfer Protocol (VRTP) .....	63
6.7	Conclusion .....	64
<b>7.</b>	<b>VRML Extensions for Distributed Virtual Worlds .....</b>	<b>65</b>
7.1	VSPLUS: Sharing Events Through Net Nodes .....	65
7.2	VASE Multicast-VR .....	69
7.3	Living Worlds .....	70
7.3.1	Motivation .....	70
7.3.2	Living Worlds Terminology .....	70
7.3.3	Zones .....	72
7.3.4	Shared Objects and Avatars .....	73
7.4	Conclusion .....	75
<b>8.</b>	<b>Partitioning of Distributed Virtual Worlds .....</b>	<b>77</b>
8.1	Spatial Partitioning .....	77
8.1.1	Grids .....	77
8.1.2	Level of Detail (LOD) .....	78
8.1.3	Bounding Boxes .....	79
8.1.4	Binary Space Partitioning Trees .....	80
8.1.5	Cells and Portals .....	81

8.2	Spatial Partitioning of Multi-User Worlds .....	83
8.2.1	Filtering .....	83
8.2.2	Locales and Beacons .....	83
8.2.3	Aura .....	84
8.3	Conclusion .....	86
9.	<b>Streaming</b> .....	87
9.1	Continuous Data Streams .....	87
9.1.1	Compression .....	87
9.1.2	Streaming in Practice .....	88
9.2	Continuous Data Streams in Distributed Virtual Worlds .....	88
9.3	Relevant Internet Protocols .....	89
9.3.1	Resource Reservation Protocol (RSVP) .....	89
9.3.2	Real-Time Streaming Protocol (RTSP) .....	90
9.3.3	Real-Time Transport Protocol (RTP) .....	91
9.4	Quality of Service for Streaming .....	93
9.4.1	Forward Error Control .....	93
9.4.2	Interarrival Jitter .....	93
9.4.3	Combined Jitter and Error Control .....	94
9.5	Spatial Hierarchical Compression .....	96
9.6	Conclusion .....	97
10.	<b>3D Technologies for the Internet</b> .....	99
10.1	Quicktime VR .....	99
10.2	MetaStream .....	101
10.3	VRML .....	102
10.4	MPEG-4 .....	102
10.5	Pure Java 1.1 Applets .....	103
10.6	Java3D .....	104
10.7	X3D .....	105
10.8	Summary .....	106

---

### Part III. Implementation

---

11.	<b>Implementing Multi-User Worlds with VRML</b> .....	109
11.1	Requirements .....	109
11.2	Existing Systems .....	109
11.3	Java- and EAI-Based Approaches .....	110
11.4	A CORBA-Based Approach .....	110
12.	<b>Java Network-Programming:</b>	
	<b>A Simple Distributed Virtual World</b> .....	113
12.1	Java Network Programming .....	113
12.1.1	HTTP Connections (Hypertext Transfer Protocol) ....	113

12.1.2 TCP (Transfer Control Protocol) .....	114
12.1.3 UDP (User Datagram Protocol) .....	115
12.1.4 Multicast UDP .....	116
12.1.5 Object Serialization .....	117
12.1.6 Remote Method Invocation (RMI) .....	117
12.2 Miss Connectivity .....	118
12.2.1 Architecture and Protocol of MissC .....	119
12.2.2 Resources of the Dead .....	120
12.2.3 Some Implementation Details of the Protocol .....	120
12.2.4 Alternative Implementations of the Protocol .....	123
12.2.5 Some Implementation Details of the Scene .....	125
12.2.6 Intra-Browser Communication .....	133
12.3 Conclusion .....	135
<b>13. Implementing Multi-User Worlds with CORBA .....</b>	<b>137</b>
13.1 A Gentle Introduction to CORBA .....	137
13.1.1 Common Object Request Broker Architecture (CORBA) .....	137
13.1.2 Object Request Broker (ORB) .....	137
13.1.3 Object Adapter .....	141
13.1.4 Interface Definition Language (IDL) .....	141
13.2 A CORBA-Based Multi-User World .....	144
13.2.1 The Protocol .....	145
13.2.2 The Client .....	145
13.2.3 The Server .....	147
13.2.4 An Alternative Protocol .....	147
13.2.5 Intra-Browser Communication .....	149
13.3 Conclusion .....	149
<b>14. The Future .....</b>	<b>151</b>
<b>List of Figures .....</b>	<b>153</b>
<b>List of Tables .....</b>	<b>155</b>
<b>References .....</b>	<b>157</b>
<b>Index .....</b>	<b>163</b>
