**Ninth Edition**

## About the Author

Best-selling author **Herbert Schildt** has written extensively about programming for nearly three decades and is a leading authority on the Java language. His books have sold millions of copies worldwide and have been translated into all major foreign languages. He is the author of numerous books on Java, including *Java: A Beginner's Guide*, *Herb Schildt's Java Programming Cookbook*, and *Swing: A Beginner's Guide*. He has also written extensively about C, C++, and C#. Although interested in all facets of computing, his primary focus is computer languages, including compilers, interpreters, and robotic control languages. He also has an active interest in the standardization of languages. Schildt holds both graduate and undergraduate degrees from the University of Illinois. He can be reached at his consulting office at (217) 586-4683. His web site is [www.HerbSchildt.com](http://www.HerbSchildt.com).

## About the Technical Editor

**Dr. Danny Coward** has worked on all editions of the Java platform. He led the definition of Java Servlets into the first version of the Java EE platform and beyond, web services into the Java ME platform, and the strategy and planning for Java SE 7. He founded JavaFX technology and, most recently, designed the largest addition to the Java EE 7 standard, the Java WebSocket API. From coding in Java to designing APIs with industry experts, to serving for several years as an executive to the Java Community Process, he has a uniquely broad perspective into multiple aspects of Java technology. Additionally, he is the author of *JavaWebSocket Programming* and an upcoming book on Java EE. Dr. Coward holds bachelor's, master's, and doctorate's in mathematics from the University of Oxford.

Neither McGraw-Hill nor its licensors shall be liable to you or anyone else for any inaccuracy, error or omission, regardless of cause, in the work or for any damages resulting therefrom. McGraw-Hill has no responsibility for the content of any information accessed through the work. Under no circumstances shall McGraw-Hill and/or its licensors be liable for any indirect, incidental, special, punitive, consequential or similar damages that result from the use of or inability to use the work, even if any of them has been advised of the possibility of such damages. This limitation of liability shall apply to any claim or cause whatsoever whether such claim or cause arises in contract, tort or otherwise.

# Contents at a Glance

---

## **Part I    The Java Language**

- 1    The History and Evolution of Java
- 2    An Overview of Java
- 3    Data Types, Variables, and Arrays
- 4    Operators
- 5    Control Statements
- 6    Introducing Classes
- 7    A Closer Look at Methods and Classes
- 8    Inheritance
- 9    Packages and Interfaces
- 10   Exception Handling
- 11   Multithreaded Programming
- 12   Enumerations, Autoboxing, and Annotations (Metadata)
- 13   I/O, Applets, and Other Topics
- 14   Generics
- 15   Lambda Expressions

## **Part II   The Java Library**

- 16   String Handling
- 17   Exploring java.lang
- 18   java.util Part 1: The Collections Framework
- 19   java.util Part 2: More Utility Classes
- 20   Input/Output: Exploring java.io
- 21   Exploring NIO
- 22   Networking
- 23   The Applet Class

|                 |   |
|-----------------|---|
| 24              | Event Handling  |
| 25              | Introducing the AWT: Working with Windows, Graphics, and Text |
| 26              | Using AWT Controls, Layout Managers, and Menus                |
| 27              | Images  |
| 28              | The Concurrency Utilities                                     |
| 29              | The Stream API  |
| 30              | Regular Expressions and Other Packages                        |
| <b>Part III</b> | <b>Introducing GUI Programming with Swing</b>                 |
| 31              | Introducing Swing   |
| 32              | Exploring Swing   |
| 33              | Introducing Swing Menus                                       |
| <b>Part IV</b>  | <b>Introducing GUI Programming with JavaFX</b>                |
| 34              | Introducing JavaFX GUI Programming                            |
| 35              | Exploring JavaFX Controls                                     |
| 36              | Introducing JavaFX Menus                                      |
| <b>Part V</b>   | <b>Applying Java</b>  |
| 37              | Java Beans  |
| 38              | Introducing Servlets  |
| Appendix        | Using Java's Documentation Comments                           |
|                 | <b>Index</b>  |

# Contents

Preface

**Part I**   **The Java Language**

**Chapter 1**   **The History and Evolution of Java**

Java's Lineage

    The Birth of Modern Programming: C

    C++: The Next Step

    The Stage Is Set for Java

The Creation of Java

    The C# Connection

How Java Changed the Internet

    Java Applets

    Security

    Portability

Java's Magic: The Bytecode

Servlets: Java on the Server Side

The Java Buzzwords

    Simple

    Object-Oriented

    Robust

    Multithreaded

    Architecture-Neutral

    Interpreted and High Performance

    Distributed

    Dynamic

The Evolution of Java

Java SE 8

A Culture of Innovation

**Chapter 2**   **An Overview of Java**

Object-Oriented Programming

- Two Paradigms
- Abstraction
- The Three OOP Principles
- A First Simple Program
  - Entering the Program
  - Compiling the Program
  - A Closer Look at the First Sample Program
- A Second Short Program
- Two Control Statements
  - The if Statement
  - The for Loop
- Using Blocks of Code
- Lexical Issues
  - Whitespace
  - Identifiers
  - Literals
  - Comments
  - Separators
  - The Java Keywords
- The Java Class Libraries

## **Chapter 3 Data Types, Variables, and Arrays**

- Java Is a Strongly Typed Language
- The Primitive Types
- Integers
  - byte
  - short
  - int
  - long
- Floating-Point Types
  - float
  - double
- Characters
- Booleans
- A Closer Look at Literals
  - Integer Literals
  - Floating-Point Literals
  - Boolean Literals
