

Applications of Computer Vision in Fashion and Textiles

THE TEXTILE INSTITUTE BOOK SERIES

Edited by W.K. Wong

Applications of Computer Vision in Fashion and Textiles

The Textile Institute Book Series

Incorporated by Royal Charter in 1925, The Textile Institute was established as the professional body for the textile industry to provide support to businesses, practitioners and academics involved with textiles and to provide routes to professional qualifications through which Institute Members can demonstrate their professional competence. The Institute's aim is to encourage learning, recognise achievement, reward excellence and disseminate information about the textiles, clothing and footwear industries and the associated science, design and technology; it has a global reach with individual and corporate members in over 80 countries.

The Textile Institute Book Series supersedes the former 'Woodhead Publishing Series in Textiles', and represents a collaboration between The Textile Institute and Elsevier aimed at ensuring that Institute Members and the textile industry continue to have access to high calibre titles on textile science and technology.

Books published in The Textile Institute Book Series are offered on the Elsevier web site at: store.elsevier.com and are available to Textile Institute Members at a substantial discount. Textile Institute books still in print are also available directly from the Institute's web site at: www.textileinstitute.org

To place an order, or if you are interested in writing a book for this series, please contact Matthew Deans, Senior Publisher: m.deans@elsevier.com

Recently Published and Upcoming Titles in The Textile Institute Book Series:

Antimicrobial Textiles, Gang Sun, 9780081005767

Active Coatings for Smart Textiles, Jinlian Hu, 9780081002636

Advances in Women's Intimate Apparel Technology, Winnie Yu, 9781782423690

Smart Textiles and Their Applications, Vladan Koncar, 9780081005743

Advances in Technical Nonwovens, George Kellie, 9780081005750

Activated Carbon Fiber and Textiles, Jonathan Chen, 9780081006603

Performance Testing of Textiles, Lijing Wang, 9780081005705

Principles of Textile Finishing, Asim Kumar Roy Choudhury, 9780081006467

Forensic Textile Science, Debra Carr, 9780081018729

Crazing Technology for Polyester Fibers, Victor Goldade and Nataly Vinidiktova, 9780081012710

Natural Dyes for Textiles, Padma Vankar, 9780081012741

Colour Design, Second Edition, Janet Best, 9780081012703

High-Performance Apparel, John McLoughlin and Tasneem Sabir, 9780081009048

Sustainability in Denim, Subramanian Muthu, 9780081020432

Fibrous Filter Media, Philip Brown and Christopher Cox, 9780081005736

Contents

Contributors	ix
Part One Fundamentals of common computer vision techniques for fashion and textile applications	1
1 Fundamentals of common computer vision techniques for textile quality control	3
<i>J.L. Jiang, W.K. Wong</i>	
1.1 Introduction	3
1.2 Current challenges of common computer vision techniques for fabric defect detection	4
1.3 Basic system architecture of an automated fabric inspection system	4
1.4 Computer vision-based techniques for fabric defect detection	5
1.5 Current benefits of computer vision technique and its prospects for fabric defect detection	11
1.6 Summary	12
References	12
2 Fundamentals of common computer vision techniques for fashion textile modeling, recognition, and retrieval	17
<i>J.J. Wen, W.K. Wong</i>	
2.1 Introduction	17
2.2 Roadmap of computer vision technique and its significances and challenges in fashion and textile research	19
2.3 Fashion textile modeling	20
2.4 Fashion textile segmentation and recognition	28
2.5 Fashion textile retrieval	34
2.6 Prospects of computer vision technique in fashion and textile industry	39
2.7 Summary	39
References	40

Part Two	Fabric defect detection	455
3	Computer vision techniques for detecting fabric defects	477
	<i>W.K. Wong, J.L. Jiang</i>	
3.1	Introduction	477
3.2	NSSSC method	490
3.3	Experiments	535
3.4	Conclusion	577
	References	577
	Further reading	600
4	Computer vision and its application in detecting fabric defects	61
	<i>M. Eldessouki</i>	
4.1	Introduction	61
4.2	Image analysis	74
4.3	PCA and data dimensionality	77
4.4	Soft computing for detection and classification	80
4.5	Experimental applications	87
4.6	Future opportunities and challenges	97
	References	99
Part Three	Investigation and evaluation on fibers, yarns and textile quality	103
5	Investigating surface properties of fibers and yarns by image processing and statistical analysis techniques	105
	<i>T. Blachowicz, A. Ehrmann</i>	
5.1	Introduction	105
5.2	Experimental and image-processing procedure	106
5.3	Results and discussion	112
5.4	Conclusions	119
	Acknowledgments	119
	References	120
6	Computer vision techniques for detecting yarn defects	123
	<i>F. Pereira, V. Carvalho, F. Soares, R. Vasconcelos, J. Machado</i>	
6.1	Introduction	123
6.2	Fundamentals of textile yarn	124
6.3	Methods for detecting yarn parameters	128
6.4	Yarn defect detection system review	133
6.5	Final comments	142
	References	142

7	Evaluation of fabric pilling as an end-use quality and a performance measure for the fabrics	147
	<i>M. Eldessouki</i>	
7.1	Introduction	147
7.2	Computer vision and pilling evaluation	154
7.3	Pills quantization	156
7.4	Modeling human judgment (fuzzy logic)	159
7.5	Pills rating and classification	163
7.6	Practical results	166
7.7	Closing remarks	184
	References	185
8	Computer vision techniques for measuring and demonstrating color of textile	189
	<i>A. Shams-Nateri, E. Hasanlou</i>	
8.1	Introduction	189
8.2	The RGB and sRGB system	190
8.3	Color transformation and color gamut	190
8.4	Digital image processing	193
8.5	Digital camera as a noncontact measurement	198
8.6	Scanner	200
8.7	Characterization and calibration of digital camera and scanner	200
8.8	Color measurement by digital camera and scanner	206
8.9	Conclusions	215
	References	217
	Part Four Fashion and textile recognition, modeling and retrieval	221
9	Fashion accessory segmentation	223
	<i>J.J. Wen, W.K. Wong</i>	
9.1	Introduction of the application in accessory segmentation and counting	223
9.2	Architecture of accessory segmentation and counting system	225
9.3	Computer vision technique for processing material image	229
9.4	Accessory segmentation	234
9.5	Accessory recognition and counting	241
9.6	Case study and system interface	245
9.7	Summary	250
	References	251
10	Textile image retrieval using joint local PCA-based feature descriptor	253
	<i>Y. Cui, W.K. Wong</i>	
10.1	Introduction	253
10.2	Brief review of the related work	255

10.3	The novel feature descriptor for image retrieval	255
10.4	Experiments	261
10.5	Conclusions	269
	References	270
11	Precise shape estimation of dressed subjects from two-view image sets	273
	<i>P.Y. Mok, S. Zhu</i>	
11.1	Introduction	273
11.2	Related work in human modeling	274
11.3	Method	276
11.4	Potential application for bespoke suit tailoring—A case demonstration	285
11.5	Conclusion	289
	Acknowledgments	290
	References	290
	Index	293
