

Automation in Garment Manufacturing

THE TEXTILE INSTITUTE BOOK SERIES

Edited by Rajkishore Nayak and Rajiv Padhye

Automation in Garment Manufacturing

The Textile Institute Book Series

Incorporated by Royal Charter in 1925, The Textile Institute was established as the professional body for the textile industry to provide support to businesses, practitioners and academics involved with textiles and to provide routes to professional qualifications through which Institute Members can demonstrate their professional competence. The Institute's aim is to encourage learning, recognise achievement, reward excellence and disseminate information about the textiles, clothing and footwear industries and the associated science, design and technology; it has a global reach with individual and corporate members in over 80 countries.

The Textile Institute Book Series supersedes the former 'Woodhead Publishing Series in Textiles', and represents a collaboration between The Textile Institute and Elsevier aimed at ensuring that Institute Members and the textile industry continue to have access to high calibre titles on textile science and technology.

Books published in The Textile Institute Book Series are offered on the Elsevier web site at: store.elsevier.com and are available to Textile Institute Members at a substantial discount. Textile Institute books still in print are also available directly from the Institute's web site at: www.textileinstitute.org

To place an order, or if you are interested in writing a book for this series, please contact Matthew Deans, Senior Publisher: m.deans@elsevier.com

Recently Published and Upcoming Titles in The Textile Institute Book Series

Handbook of Technical Textiles, Volume 1, 2nd Edition, A. Richard Horrocks and Subhash C. Anand, 9781782424581

Handbook of Technical Textiles, Volume 2, 2nd Edition, A. Richard Horrocks and Subhash C. Anand, 9781782424659

Geotextiles, Robert Koerner, 9780081002216

Advances in Braiding Technology, Yordan Kyosev, 9780081009260

Antimicrobial Textiles, Gang Sun, 9780081005767

Active Coatings for Smart Textiles, Jinlian Hu, 9780081002636

Advances in Women's Intimate Apparel Technology, Winnie Yu, 9781782423690

Smart Textiles and Their Applications, Vladan Koncar, 9780081005743

Advances in Technical Nonwovens, George Kellie, 9780081005750

Activated Carbon Fiber and Textiles, Jonathan Chen, 9780081006603

Performance Testing of Textiles, Lijing Wang, 9780081005705

Colour Design, Janet Best, 9780081012703

Forensic Textile Science, Debra Carr, 9780081018729

Principles of Textile Finishing, Asim Kumar Roy Choudhury, 9780081006467

High-Performance Apparel, John McLoughlin and Tasneem Sabir, 9780081009048

Contents

List of contributors	xi
1 Introduction to automation in garment manufacturing	1
<i>Rajkishore Nayak and Rajiv Padhye</i>	
1.1 Introduction	1
1.2 Automation in garment production	8
1.3 Areas of automation	10
1.4 Difficulties in automation	16
1.5 Advantages and disadvantages of automation	19
1.6 Book contents	21
1.7 Future trends	23
1.8 Conclusion	24
References	25
2 Automation versus modeling and simulation	29
<i>Katerina Machova</i>	
2.1 Introduction	29
2.2 The way from idea to technical sheets	30
2.3 Pattern development	33
2.4 Basic pattern	36
2.5 Cutting and printing systems	39
2.6 Joining systems	42
2.7 Fitting systems	44
2.8 Conclusion	45
Sources of further information	46
References	46
3 Automation in production of yarns, woven, and knitted fabrics	49
<i>Marco Saggiomo, Marko Wischnowski, Kristina Simonis and Thomas Gries</i>	
3.1 Introduction	49
3.2 Types of industries	49
3.3 Global spinning machine manufacturers	50
3.4 Automation in production of sewing threads	54
3.5 Automation in production of woven fabrics	55
3.6 Automation in production of weft-knitted fabrics	63
3.7 Conclusion	71
References	72

4	Automation in fabric inspection	75
	<i>Ashvani Goyal</i>	
4.1	Introduction	75
4.2	Fabric inspection	75
4.3	Conventional fabric inspection techniques	76
4.4	Automatic fabric inspection techniques	78
4.5	Commercial automated fabric inspection systems	95
4.6	Conclusion	99
	References	100
5	Artificial intelligence and its application in the apparel industry	109
	<i>Rajkishore Nayak and Rajiv Padhye</i>	
5.1	Introduction	109
5.2	Types of artificial intelligence	113
5.3	Applications of artificial intelligence in apparel industry	117
5.4	Challenges and future directions of artificial intelligence	129
5.5	Conclusion	131
	Sources of further information	132
	References	133
6	Automation in spreading and cutting	139
	<i>Ineta Vilumsone-Nemes</i>	
6.1	Introduction	139
6.2	The role of automation in textile material spreading and cutting	140
6.3	Automation in cutting room work process organization	140
6.4	Automated spreading methods and machines	143
6.5	Automated fabric pattern matching	147
6.6	Automated cutting methods and cutting systems	150
6.7	Fusing of cut components	159
6.8	Future trends in automation of textile material spreading and cutting	162
6.9	Conclusion	163
	Further reading	163
7	Automation in material handling	165
	<i>Volker Lutz, Hans-Christian Fröh, Thomas Gries and Josef Klingele</i>	
7.1	Introduction	165
7.2	Gripping technologies for textile handling	168
7.3	Automation in material handling related to high-performance textiles	171
7.4	Digital tracking with radio-frequency identification	173
7.5	Conclusion	174
	References	175
	Further reading	177

8	Application of robotics in garment manufacturing	179
	<i>Thomas Gries and Volker Lutz</i>	
8.1	Introduction	179
8.2	Automation and robotics for sewing	180
8.3	Computer numerical control technologies for sewing process	182
8.4	Sewing automats and sewing units	184
8.5	Robotics for three-dimensional sewing operations	186
8.6	Real-time sewing cell with two lightweight industrial robots	189
8.7	Advantages and disadvantages of automation in sewing	194
8.8	Conclusion	194
	References	196
	Further reading	197
9	Automation in sewing technology	199
	<i>Prabir Jana</i>	
9.1	Introduction	199
9.2	Basic kinematics for continuous and cyclic sewing machines	200
9.3	The building blocks of automation	206
9.4	Evolution of sewing automats	216
9.5	Sewing machines with under bed trimmer	218
9.6	Sewing machine with automatic bobbin changer	220
9.7	Sewing automats for gent's and lady's shirts	221
9.8	Sewing automats for casual bottom wear	223
9.9	Sewing automats for formal wear	225
9.10	Sewing automats for knitwear and intimate wear	227
9.11	Sewing automats for nonapparel sewn products	230
9.12	Sewing preparatory machines with automatic control system	231
9.13	Future trends	232
	Sources of further information	233
	References	235
	Further reading	236
10	3D body scanning	237
	<i>Hein A.M. Daanen and Agnes Psikuta</i>	
10.1	Introduction	237
10.2	Body dimensions and garment sizing	237
10.3	3D body scanners	239
10.4	3D body scan	242
10.5	Virtual fit of garments	245
10.6	International standardization activities	248
10.7	Conclusion	250
	References	250

11	Computer-aided design—garment designing and patternmaking	253
	<i>Yamini Jhanji</i>	
11.1	Role of computers in textile and apparel industry	253
11.2	Introduction to computer-aided design	254
11.3	Different software used in designing and garment construction	259
11.4	Computer-aided design for fabric design	265
11.5	Computer-aided design for apparel design	269
11.6	Computer-aided design for designing process	270
11.7	Computer-aided design in patternmaking	272
11.8	3D fashion design and development software	279
11.9	Computer-aided design in cutting room operations	285
11.10	Conclusion	289
	References	289
12	Advancements in production planning and control	291
	<i>Sweta Patnaik and Asis Patnaik</i>	
12.1	Introduction	291
12.2	Automation in production systems	292
12.3	Automation in manufacturing systems	296
12.4	Advancements in production planning	299
12.5	Application of different software and planning tools in production planning and control	303
12.6	Computerized manufacturing support systems	306
12.7	Recent trends	306
12.8	Conclusion	307
	References	307
13	Use of advanced tools and equipment in industrial engineering	311
	<i>Maria-Carmen Loghin, Irina Ionescu, Emil-Constantin Loghin and Ionuț Dulgheriu</i>	
13.1	Introduction	311
13.2	Work study	312
13.3	Motion study and standard time setting	335
13.4	Line balancing and work efficiency in clothing manufacturing	343
13.5	Conclusion	350
	References	351
14	Automation in quality monitoring of fabrics and garment seams	353
	<i>Thomas Gries, Volker Lutz, Volker Niebel, Marco Saggiomo and Kristina Simonis</i>	
14.1	Introduction	353
14.2	Quality monitoring of woven fabrics	353
14.3	Quality monitoring of seams	361
14.4	Quality monitoring of welded seams	369
14.5	Conclusion	373
	Acknowledgements	373
	References	374

15	Recent developments in the garment supply chain	377
	<i>Amanpreet Singh and Kanwalpreet Nijhar</i>	
15.1	Introduction	377
15.2	Garment supply chain activities	379
15.3	Contemporary issues in garment supply chain	384
15.4	Contemporary trends in apparel supply chain	387
15.5	Conclusion	393
	References	393
	Index	397
