Notices

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

CONTENTS

List of Contributors *xiii*
Preface *xvii*

1. Introduction **1**
Felipe Jiménez
1.1 Intelligent Transport Systems (ITS) 1
1.2 Early Initiatives 4
1.2.1 Europe 4
1.2.2 United States 5
1.2.3 Japan 7
1.3 Services 7
1.3.1 Provision of Information to the User 8
1.3.2 Traffic Management 9
1.3.3 Freight Transportation Operation 10
1.3.4 Public Transport Operation 12
1.3.5 Electronic Payment 14
1.3.6 Emergencies 15
1.4 Intelligent Vehicles 15
1.5 Book Structure 17
References 20
Further Reading 20

Part I Enabling Technologies **21**

2. Environmental Perception for Intelligent Vehicles **23**
José M. Armingol, Jorge Alfonso, Nourdine Aliane, Miguel Clavijo, Sergio Campos-Cordobés, Arturo de la Escalera, Javier del Ser, Javier Fernández, Fernando García, Felipe Jiménez, Antonio M. López, Mario Mata, David Martín, José M. Menéndez, Javier Sanchez-Cubillo, David Vázquez and Gabriel Villalonga
2.1 Vision-Based Road Information 24
2.1.1 Environmental Variability 25
2.1.2 Lane Detection 27
2.1.3 Traffic Signs Recognition 31
2.1.4 Commercial Systems 34

2.2 Vision-Based Perception 36
2.2.1 Vision-Based Object Detection and Semantic Segmentation 39
2.2.2 Onboard Vision-Based Object Detection 40
2.2.3 Onboard Vision-Based Semantic Segmentation 47
2.2.4 Onboard Vision Based on Deep Learning 49
2.3 Lidar-Based Perception 53
2.3.1 Surroundings Recognition 54
2.4 Sensing From the Infrastructure 61
2.4.1 Autonomous Traffic Sensors 61
2.4.2 Dependant Traffic Sensors 79
2.4.3 Conclusions and Recommendations 83
2.5 Data Fusion 83
2.5.1 Data Fusion Levels 84
2.5.2 Architectures 86
2.5.3 Data Fusion in Intelligent Transport Systems 90
References 93
Further Reading 100

3. Vehicular Communications 103

Jorge Alfonso, José E. Naranjo, José M. Menéndez and Arrate Alonso

3.1 Standardization in Vehicular Communications 106
3.1.1 Introduction 106
3.1.2 The ISO CALM Framework 107
3.1.3 Vehicular Communications in a Mobile Communications Scenario 118
3.1.4 Conclusions 120
3.2 Technology 121
3.2.1 Introduction 121
3.2.2 Reference Architecture 121
3.2.3 Operative Technologies 123
3.2.4 Hybrid Communication Approach 132
3.2.5 Services 133
3.2.6 Security and Privacy 135
3.2.7 Interoperability 136
References 137
Related standards 137

4. Positioning and Digital Maps 141

Rafael Toledo-Moreo, José M. Armingol, Miguel Clavijo, Arturo de la Escalera, Javier del Ser, Felipe Jiménez, Basam Musleh, José E. Naranjo, Ignacio (Iñaki) Olabarrieta and Javier Sanchez-Cubillo

4.1 Positioning Based Systems for Intelligent Vehicles 142
4.1.1 Definitions 142
4.1.2 Location Based Services and Applications Based on Position 144

4.2 GNSS-Based Positioning 144
4.2.1 Motivation, Requirements and Working Principles 144
4.2.2 Performance Parameters 148
4.2.3 Satellite Positioning in ITS Domain and Applications 150
4.2.4 Future of GNSS in ITS 151
4.3 GNSS Aiding and Hybridized Positioning Systems 152
4.3.1 Technologies for GNSS-Aided Positioning and Navigation 152
4.3.2 GNSS/DR Positioning 153
4.4 Digital Maps 157
4.4.1 Importance and Utility 157
4.4.2 Specifications 158
4.4.3 Digital Map Development 160
4.4.4 Map Quality Assessment 162
4.4.5 Map-Matching 164
4.4.6 Map-Assisted GNSS Positioning 165
4.5 Alternatives to GNSS Positioning 167
4.5.1 Visual Odometry as Vehicle's Movement Estimator 167
4.5.2 Wireless Networks 171
4.5.3 RFID 172
References 172

5 Big Data in Road Transport and Mobility Research 175
Sergio Campos-Cordobés, Javier del Ser, Ibai Laña, Ignacio (Iñaki) Olabarrieta, Javier Sánchez-Cubillo, Javier J. Sánchez-Medina and Ana I. Torre-Bastida
5.1 Data and Information Sources 176
5.2 Data Preprocessing 179
5.2.1 Feature Engineering 179
5.2.2 Dimensionality Reduction 181
5.3 Data Normalization 184
5.3.1 Data Cleaning 184
5.3.2 Formats and Standards 185
5.3.3 Ontologies 187
5.4 Supervised Learning 188
5.4.1 Predictive Versus Descriptive 189
5.4.2 Classification Versus Regression 189
5.4.3 Learners 190
5.4.4 Real Time Application 191
5.4.5 Concept Drift Handling 191
5.5 Nonsupervised Learning 192
5.6 Processing Architectures 195

5.7 Applications 197
5.7.1 Transport Demand Modeling 197
5.7.2 Short-Term Traffic State Prediction 198
5.7.3 Planning/Routing 199
References 201
Further Reading 205

Part II Applications 207

6. Driver Assistance Systems and Safety Systems 209
Felipe Jiménez
6.1 Integrated Safety Model 209
6.2 Systems for Improving Driving Task 213
6.2.1 Assistance Systems Aim 213
6.2.2 Classification 215
6.3 Electronic Aids for Reducing Accidents Consequences 220
6.3.1 Secondary Safety Systems 220
6.3.2 Interaction Between Primary and Secondary Safety Systems 221
6.3.3 Tertiary Safety Systems 222
6.4 Future Evolution of Assistance and Safety Systems 223
References 225

7. Cooperative Systems 227
Ana Paúl, José A. Fernández, Felipe Jiménez and Francisco Sánchez
7.1 Introduction 227
7.2 C-ITS Framework 229
7.2.1 General Architecture 229
7.2.2 Support Technologies 231
7.2.3 Public Land Mobile Networks (Cellular Networks) 232
7.2.4 ITS G5 (Vehicular Wi-Fi) 234
7.2.5 Standardization Level 236
7.3 Services 238
7.3.1 Introduction 238
7.3.2 Systems Oriented to Information Provision 239
7.3.3 Systems Oriented to Improve Safety 243
7.3.4 Systems Oriented to Improve Efficiency 246
7.4 Challenges Toward Deployment 249
7.4.1 Technical Issues 249
7.4.2 Implementation Issues 251

7.5 Main Related Initiatives at European Level 252
7.5.1 Interurban Mobility Pilots 255
7.5.2 Urban Mobility Pilots 259
7.5.3 Collaborative Platforms and Supporting Initiatives 262
7.6 Next Steps 271
References 273
Further Reading 273

8. Automated Driving 275

Jorge Villagra, Leopoldo Acosta, Antonio Artuñedo, Rosa Blanco, Miguel Clavijo, Carlos Fernández, Jorge Godoy, Rodolfo Haber, Felipe Jiménez, Carlos Martínez, José E. Naranjo, Pedro J. Navarro, Ana Paúl and Francisco Sánchez

8.1 Fundamentals 275
8.2 Technology Bricks 279
8.2.1 Control Architectures 279
8.2.2 Situation Awareness and Risk Assessment 283
8.2.3 Decision Making 286
8.2.4 Driver–Vehicle Interaction 289
8.2.5 Motion Planning 292
8.2.6 Vehicle Control 304
8.3 Cooperative Automated Driving 310
8.3.1 Platooning 311
8.3.2 Urban Road Transport 314
8.4 Verification and Validation 315
8.5 Main Initiatives and Applications 317
8.5.1 Prototypes 317
8.5.2 Projects 322
8.5.3 Special Applications 327
8.6 Socioregulatory Aspects 332
8.6.1 Legal Pathways 332
8.6.2 Ethical Aspects 338
References 339

Part III Additional Aspects 343

9. Human Factors 345

Subchapter 9.1 Human Driver Behaviors 346

Luis M. Bergasa, Enrique Cabello, Roberto Arroyo, Eduardo Romera and Ángel Serrano

9.1.1 Introduction 346
9.1.2 Driving Style: Definitions 348

9.1.3 Measures for Driving Style Modeling 350
9.1.3.1 Driver Biological Measures 350
9.1.3.2 Driver Physical Measures 352
9.1.3.3 Vehicle Dynamics Measures 352
9.1.3.4 Sociodemographic Measures 354
9.1.3.5 Hybrid Measures 355
9.1.4 Driving Style Classification 355
9.1.4.1 Discrete Classes 356
9.1.4.2 Continuous Scoring 357
9.1.5 Algorithms for Driving Style Modeling 357
9.1.5.1 Unsupervised Learning Techniques 361
9.1.5.2 Supervised Learning Techniques 362
9.1.5.3 General Observations 365
9.1.6 Datasets for Driving Style Modeling 368
9.1.7 Applications for Intelligent Vehicles 370
9.1.7.1 Level 1 371
9.1.7.2 Level 2 373
9.1.7.3 Level 3 375
9.1.7.4 Level 4 377
9.1.7.5 Applications for Consumption Efficiency 378
References 378

Subchapter 9.2 User Interface 384

Alfonso Brazález, Olatz Iparraguirre and Joshua Puerta

9.2.1 Introduction: Feedback Channels 384
9.2.1.1 Visual Channel 385
9.2.1.2 Acoustic Channel 385
9.2.1.3 Speech Recognition 386
9.2.1.4 Haptic Output 387
9.2.1.5 Multimodality 388
9.2.2 Cognitive Load and Work Load 388
9.2.3 Information Classification and Prioritization 390
9.2.4 Implementation Issues 391
9.2.5 Guidelines and Standards 392
References 394

10. Simulation Tools 395

Subchapter 10.1 Driving Simulators 396

Alfonso Brazález, Luis Matey, Borja Núñez, and Ana Paúl

10.1.1 Introduction 396
10.1.2 Architecture of Driving Simulators 398
10.1.3 Applications 400
References 403
