ENGINEERING YOUR FUTURE

AN AUSTRALASIAN GUIDE

SECOND EDITION

- Converted from Online VitalSource Document 2015. May be Subject to page errors.
Section 14 updated to include a LinkedIn discussion regarding future Australian
Engineering. - No current skill shortage... (Boom over)

ENGINEERING YOUR FUTURE

AN AUSTRALASIAN GUIDE

SECOND EDITION

David DOWLING Anna CAREW Roger HADGRAFT

WILEY

John Wiley & Sons Australia, Ltd

Second edition published 2013 by
John Wiley & Sons Australia, Ltd
42 McDougall Street, Milton Qld 4064

First edition published 2010

Typeset in 10.5/13.5 pt Adobe Garamond LT

© David Dowling, Anna Carew, Roger Hadgraft 2010, 2013

The moral rights of the authors have been asserted.

National Library of Australia Cataloguing-in-Publication entry

Author:	Dowling, David Graeme.
Title:	Engineering your future: an Australasian guide/David Dowling; Anna Carew; Roger Hadgraft.
Edition:	2nd ed.
ISBN:	978 0 730 30197 4 (pbk.)
Notes:	Includes index.
Subjects:	Engineering. Sustainable engineering. Engineering ethics. Engineering — Management.
Other Authors/Contributors:	Carew, Anna. Hadgraft, R. G.
Dewey Number:	620

Reproduction and Communication for educational purposes

The Australian *Copyright Act 1968 (the Act)* allows a maximum of 10% of the pages of this work or — where this work is divided into chapters — one chapter, whichever is the greater, to be reproduced and/or communicated by any educational institution for its educational purposes provided that the educational institution (or the body that administers it) has given a remuneration notice to Copyright Agency Limited (CAL).

Reproduction and Communication for other purposes

Except as permitted under the Act (for example, a fair dealing for the purposes of study, research, criticism or review), no part of this book may be reproduced, stored in a retrieval system, communicated or transmitted in any form or by any means without prior written permission. All inquiries should be made to the publisher.

BRIEF CONTENTS

Part 1 Introduction to engineering 1

1. What is engineering? 3
2. The engineering method 51
3. Sustainable engineering 97

Part 2 Skills development 149

4. Self-management 151
5. Understanding communication 205
6. Enabling skills for engineers 259
7. Professional responsibility and ethics 315

Part 3 Applying the engineering method 359

8. Understanding the problem 361
9. Engineering design 413
10. Evaluating options 465
11. Engineering decision-making 495
12. Communicating information 533
13. Managing engineering projects 607

Part 4 Planning your career 657

14. Your engineering future 659

CONTENTS

About the authors xiii

Preface xvi

Transition guide xix

Engineering text applications at a glance xx

Part 1 Introduction to engineering 1

1. What is engineering? 3

Learning objectives 3

Introduction 4

What is the role of an engineer? 5

A historical perspective 6

A contemporary perspective 7

Spotlight: Engineering the national broadcaster 8

Engineering disciplines 9

Electrical, electronics and telecommunications engineering 11

Mechanical engineering 12

Aerospace and aviation engineering 14

Spotlight: Keeping the doctors aloft 14

Chemical engineering 16

Civil engineering 16

Environmental engineering 16

Materials engineering 17

Mining engineering 18

Other engineering disciplines 18

Spotlight: Women in engineering 21

The core skills and attributes of an engineer 22

The Engineers Australia framework 23

The Institution of Professional Engineers New Zealand (IPENZ) framework 26

Spotlight: Engineering: it can be a mouthful 27

Engineering science 28

Spotlight: Fluid mechanics learning path 29

Spotlight: Structural mechanics learning path 29

The impact of engineering on society and national identity 30

A historical perspective 31

Spotlight: Engineering breakthroughs in early Australian history 35

Spotlight: Engineering breakthroughs in early New Zealand history 36

A contemporary perspective 39

Engineering innovations 41

Limitations of engineering 42

Spotlight: Consumer electronics and e-waste 42

Professionalism, certification and ethical practice in engineering 44

Summary 46

Key terms 47

Exercises 47

Project activity 48

2. The engineering method 51

Learning objectives 51

Introduction 52

The engineering method 53

Step 1. Explore the problem 54

Spotlight: Wind energy 55

Step 2. Exploring alternative solutions 61

Spotlight: Water recycling 62

Step 3. Evaluating alternative solutions 63

Step 4. Engineering decision-making 65

Step 5. Communicating your recommendation 66

The scientific method 66

Systems thinking 67

Spotlight: Weather models 69

Spotlight: Warehouse woes 71

Project management 72

Scheduling 72

Resources 74

Documentation — the design file 74

Time–accuracy trade-off 76

Risk management 77

Spotlight: Design for earthquake-resistant buildings 77

Reporting and documentation 81

Improving practice 82

Lifelong learning 83

Spotlight: Engineers Australia and the Institution of Professional Engineers New Zealand — continuing professional development 84

The engineering method and project management 85

The life cycle of an engineering asset 86

Design 88

Spotlight: Australasian new car assessment program 89

Summary 92

Key terms 93

Exercises 93

Project activity 94

3. Sustainable engineering 97

Learning objectives 97

Introduction 98

What is ecologically sustainable development (ESD)? 100

Definitions of ESD 101

Spotlight: The damming of Lake Pedder 102

Spotlight: Z-Mag stirrer and the NZ emissions trading scheme 105

What is sustainable engineering? 107

Why sustainable engineering? 109

Strategies for practising sustainable engineering 110

Spotlight: Pickle liquor recycling in steel processing 111

Constraints of sustainable engineering practice 112

Triple bottom line analysis (TBLA) 113

Environmentally sustainable engineering 114

A global perspective 114

Spotlight: Landfill gas in Western Australia 117

Measuring environmental impacts 118

Spotlight: Wine carbon footprinting 120

Life cycle assessment (LCA) 122

Spotlight: Life cycle assessment of Greek beer 125

Socially sustainable engineering 127

Promoting intergenerational and intragenerational equity 127

Spotlight: Rio Tinto 129

Maslow's hierarchy of needs 131

Community communication and consultation 132

Multi-criteria decision analysis (MCDA) 133

Spotlight: Multi-criteria evaluation: recreation and tourism in Victoria 134

Engagement techniques 136

Economically sustainable engineering 137

Costing 137

Economic theories 138

Least cost planning 138*Spotlight: Least cost planning in the 'sunburnt country'* 139

Summary 141

Key terms 142

Exercises 143

Project activity 145

Part 2 Skills development 149**4. Self-management** 151**Learning objectives** 151**Introduction** 152**Understanding self** 155**Your personality and attitudes** 155*Spotlight: The Competencies of Engineering Graduates Project* 156**Learning styles** 159**Spatial ability** 161**What motivates you?** 162*Spotlight: A graduate's perspective* 163**Sources of inspiration** 165*Spotlight: Telecommunications towers* 166*Spotlight: Putting passion into practice* 169**Developing your skills** 170**Developing an inquiring mind** 171*Spotlight: Hydrographic surveys* 172**Self-management skills** 174**Developing goals and strategies** 175**Being responsible** 175**Being professional** 176**Managing your time effectively** 176**Life-long learning** 177*Spotlight: Tullamarine-Calder Interchange* 178**Knowledge frameworks** 180**The program framework** 180

Managing your learning 184

Spotlight: The Law of the Pendulum 185

Spotlight: Promoting a culture of life-long learning among engineering staff 190

Reviewing your performance 192

Spotlight: A reflection: working on large projects in isolated areas 194

Levels of reflection 196

Kolb's Learning Cycle 196

Summary 198

Key terms 199

Exercises 200

Project activity 200

5. Understanding communication 205

Learning objectives 205

Introduction 206

What is communication? 208

Key communication skills for engineers 208

Communication theories and models 209

The communication process 209

A contemporary model 211

Spotlight: Global Workshare for major projects: the Ma-aden Project 212

Developing a communication model for engineers 214

Communication contexts 220

Characteristics of communicators 221

Spotlight: Releasing Fletcher Aluminium's invisible handbrake 221

Spotlight: Developing, managing and communicating our brand 225

Environments 227

Spotlight: The TrackStar Alliance document management system 228

Digital communication 230

Spotlight: Communicating from space 230

Communication methods 232

Channels 232

Communication languages 233

Noise 236
