Mastering the 5 Skills

Each of the next five chapters will put you at the center of a realistic situation—and then help you navigate through it using one of the five thinking skills. You'll learn what questions to ask, in what order, and then how to act upon those answers.

Master these skills, and you'll be able to approach any situation or problem with a proven skill and process. As a result, your response time will improve, you'll be more effective, and you will have a greater confidence in everything you do.
