To Professor Stanley Backer of MIT (now deceased) who introduced me (SKB) to the subject and inspired me to understand the structure, properties and the technologies that formed the foundation of an emergent industry in the 20th century.

To Professor Malcom Burnip who first taught me (BP) about nonvovens in the early 1970s at Huddersfield Polytechnic. As a teacher and mentor, and aided by a small card and a needle loom, he inspired many students.

To industrial members of the Nonvovens Cooperative Research Center and the Nonvovens Institute at North Carolina State University, as well as affiliated faculty and students, who gave meaning to the interdisciplinary education and research structure needed by the global nonvovens industry.
