Preface

1 Research: a way of thinking

Research: an integral part of your practice

Research: a way to gather evidence for your practice

Applications of research

Research: what does it mean?

The research process: characteristics and requirements

Types of research

Types of research: application perspective

Types of research: objectives perspective

Types of research: mode of enquiry perspective

Paradigms of research

Summary

2 The research process: a quick glance

The research process: an eight-step model

Phase I: deciding what to research

Step I: formulating a research problem

Phase II: planning a research study

Step II: conceptualising a research design

Step III: constructing an instrument for data collection

Step IV: selecting a sample

Step V: writing a research proposal

Phase III: conducting a research study

Step VI: collecting data

Step VII: processing and displaying data

Step VIII: writing a research report

Summary

STEP I FORMULATING A RESEARCH PROBLEM

3 Reviewing the literature

The place of the literature review in research

Bringing clarity and focus to your research problem

Improving your research methodology

Broadening your knowledge base in your research area

Enabling you to contextualise your findings

How to review the literature

Searching for the existing literature

Reviewing the selected literature

Developing a theoretical framework

Developing a conceptual framework

Writing about the literature reviewed

Summary

4 Formulating a research problem

The research problem

The importance of formulating a research problem

Sources of research problems

Considerations in selecting a research problem

Steps in formulating a research problem

The formulation of research objectives

The study population

Establishing operational definitions

Formulating a research problem in qualitative research

Summary

5 Identifying variables

What is a variable?

The difference between a concept and a variable

Converting concepts into variables

Types of variable

From the viewpoint of causal relationship

From the viewpoint of the study design

From the viewpoint of the unit of measurement

Types of measurement scale

The nominal or classificatory scale

The ordinal or ranking scale

The interval scale

The ratio scale

Summary

6 Constructing hypotheses

The definition of a hypothesis

The functions of a hypothesis

The testing of a hypothesis

The characteristics of a hypothesis

Types of hypothesis

Errors in testing a hypothesis

Hypotheses in qualitative research

Summary

STEP II CONCEPTUALISING A RESEARCH DESIGN

7 The research design

What is a research design?

The functions of a research design

The theory of causality and the research design

Summary

8 Selecting a study design

Differences between quantitative and qualitative study designs

Study designs in quantitative research

Study designs based on the number of contacts

Study designs based on the reference period

Study designs based on the nature of the investigation

Other designs commonly used in quantitative research

The cross-over comparative experimental design

The replicated cross-sectional design

Trend studies

Cohort studies

Panel studies

Blind studies

Double-blind studies

Study designs in qualitative research

Case study

Oral history

Focus groups/group interviews

Participant observation

Holistic research

Community discussion forums

Reflective journal log

Other commonly used philosophy-guided designs

Action research

Feminist research

Participatory and collaborative research enquiry

Summary

STEP III CONSTRUCTING AN INSTRUMENT FOR DATA COLLECTION

9 Selecting a method of data collection

Differences in the methods of data collection in quantitative and qualitative research

Major approaches to information gathering

Collecting data using primary sources
