<i>Contributor contact details</i>	ix
<i>Woodhead Publishing Series in Textiles</i>	xi
<i>Introduction</i>	xvii
<b>Part I General issues</b>	<b>1</b>
<b>1 Synthetic polymer fibers and their processing requirements</b>	<b>3</b>
G. BHAT and V. KANDAGOR, The University of Tennessee, USA	
1.1 Introduction	3
1.2 Chemistry of fiber-forming polymers	6
1.3 Polymerization processes	14
1.4 Influence of chemical structure on the physical properties of chemicals and fibers	17
1.5 Effects of molecular weight on fiber spinnability, structure and properties	18
1.6 Flow properties of polymers	19
1.7 Principles of solidification during fiber formation	21
1.8 Fiber formation techniques	22
1.9 Post-fiber formation treatments	26
1.10 Current trends	26
1.11 Conclusion	26
1.12 References	27
<b>2 Understanding the behaviour of synthetic polymer fibres during spinning</b>	<b>31</b>
E. DEVAUX, Ecole Nationale Supérieure des Arts et Industries Textiles (ENSAIT), and Centre Européen des Textiles Innovants (CETI), France	
2.1 Introduction	31
2.2 Molten state rheology of thermoplastic polymers	32

2.3	Polymer behaviour during cooling and resulting fibre structure	35
2.4	Polymer behaviour during filament spinning	39
2.5	The die swell phenomenon	41
2.6	Drawing of polymers: changes in morphology and properties of filaments	44
2.7	References	45
<b>3</b>	<b>Technologies for the manufacture of synthetic polymer fibers</b>	<b>48</b>
	J. HAGEWOOD, J Hagewood LLC, USA	
3.1	Introduction	48
3.2	Textile filament and bulk continuous fiber (BCF) spinning	50
3.3	Staple fiber spinning	52
3.4	Industrial fiber spinning equipment	54
3.5	Monofilament fiber equipment	55
3.6	Bicomponent fiber equipment	58
3.7	Spunbond lines	61
3.8	Melt blown processes	65
3.9	Solvent spinning lines	66
3.10	Hollow fiber membranes	67
3.11	Gel spinning	69
3.12	Nano-fiber spinning	69
3.13	Conclusion	70
3.14	References	70
<b>Part II</b>	<b>Spinning techniques</b>	<b>73</b>
<b>4</b>	<b>Melt spinning of synthetic polymeric filaments</b>	<b>75</b>
	A. RAWAL and S. MUKHOPADHYAY, Indian Institute of Technology Delhi, India	
4.1	Introduction	75
4.2	Fundamentals of melt spinning	76
4.3	Modeling of polymer flows in melt spinning	79
4.4	Filament interaction with the environment in melt spinning	84
4.5	Limitations of melt spinning	88
4.6	Developments in melt spinning	88
4.7	Future trends	95
4.8	Conclusion	95
4.9	Sources of further information and advice	96
4.10	References	96

<b>5</b>	<b>Gel spinning of synthetic polymer fibers</b>	100
	C. J. KUO and W. L. LAN, National Taiwan University of Science and Technology, Taiwan	
5.1	Introduction	100
5.2	Factors affecting the spinning of polymers: entanglement	101
5.3	Factors affecting fibre strength	102
5.4	Gel spinning technologies	103
5.5	Types of fibres produced using gel spinning	105
5.6	Factors affecting gel spinning	106
5.7	Gel spun textile products	109
5.8	Conclusion and future trends	110
5.9	References	112
<b>6</b>	<b>Bi-component and bi-constituent spinning of synthetic polymer fibres</b>	113
	S. MUKHOPADHYAY, Indian Institute of Technology Delhi, India	
6.1	Introduction	113
6.2	Classification of bi-component fibres	114
6.3	Spinning technologies	116
6.4	Factors affecting bi-component and bi-constituent spinning	120
6.5	Applications of bi-component fibres	124
6.6	Future trends	126
6.7	References	126
<b>7</b>	<b>Electrospinning, processing and characterization of polymer-based nano-composite fibers</b>	128
	Q. Q. NI, X. D. JIN, H. XIA and F. LIU, Shinshu University, Japan	
7.1	Introduction	128
7.2	Principles of electrospinning	129
7.3	Electrospinning technology	130
7.4	Electrospinning of nanofibers	132
7.5	Properties of electrospun nanofibers	134
7.6	Conclusion	145
7.7	References	145
<b>8</b>	<b>Integrated composite spinning (ICS)</b>	149
	W. OXENHAM, North Carolina State University, USA	
8.1	Introduction	149
8.2	The background and history of integrated composite spinning (ICS)	150

8.3	The development of ICS technology	153
8.4	The impact of material selection and processing parameters on ICS yarn properties	160
8.5	Commercialization of the process	166
8.6	Assessing the advantages and disadvantages of ICS technology	168
8.7	Future trends	169
8.8	Conclusion	170
8.9	References	171
<b>9</b>	<b>Wet spinning of synthetic polymer fibers</b>	<b>174</b>
	B. OZIPEK and H. KARAKAS, Istanbul Technical University, Turkey	
9.1	Introduction	174
9.2	Principles of wet spinning	174
9.3	Types of fibers used	177
9.4	Fiber properties	182
9.5	Factors affecting wet spinning	183
9.6	Applications and future trends	184
9.7	References	185
<b>10</b>	<b>Dry spinning of synthetic polymer fibers</b>	<b>187</b>
	Y. IMURA, New Jersey Institute of Technology, USA, R. M. C. HOGAN, Omni Tech International, USA and M. JAFFE, New Jersey Institute of Technology, USA	
10.1	Introduction	187
10.2	The dry spinning process	189
10.3	Characteristics of dry spun fibers	190
10.4	Variables in dry spinning	191
10.5	Dry spinning of acrylic fibres	193
10.6	Dry spinning of cellulose acetate and triacetate	196
10.7	Dry spinning of other fibers: polybenzimidazole (PBI), spandex and polyvinyl chloride (PVC)	199
10.8	Conclusion and future trends	201
10.9	References	201
	<i>Index</i>	203
