Contents

Contributors	iii
Preface	xvii
1 Introduction	1
<i>James H. Clark</i>	
1 Introduction	1
1.1 Chemistry—past, present and future	1
1.2 The costs of waste	3
1.3 The greening of chemistry	3
References	9
2 Principles of Sustainable and Green Chemistry	10
<i>Mike Lancaster</i>	
1 Introduction	10
2 Green Chemistry and Industry	10
3 Waste Minimisation and Atom Economy	12
3.1 Atom economy	12
3.2 Some inherently atom economic reactions	13
3.3 Some inherently atom uneconomic reactions	15
4 Reduction of Materials Use	15
4.1 Catalytic solutions	16
4.2 Question the need for protection	17
4.3 Reduction of non-renewable raw material use	17
4.4 Process intensification	19
5 Reduction of Energy Requirement	20
5.1 Some energy efficiency improvements	21
5.2 Alternative energy sources	22
6 Reduction of Risk and Hazard	22
6.1 Inherently safe design	22
6.2 Alternative solvents	25
7 Conclusions	25
References	26
3 Chemistry and the Environment	28
<i>John V. Holder</i>	
1 Introduction	28

2	Chemistry of the Atmosphere	28
2.1	Structure of the atmosphere	28
2.2	Tropospheric pollution	30
2.3	Stratospheric pollution	38
2.4	Pollution of the built environment	39
3	Chemistry of the Terrestrial Environment	39
3.1	The Earth's crust	39
3.2	Pollution of the land	40
3.3	Freshwaters	43
3.4	Pollution of freshwater	44
4	Chemistry of the Oceans	50
4.1	Chemistry of the open ocean	50
4.2	Chemistry of estuaries	51
4.3	Pollution of the oceans	52
5	Conclusion	54
	References	54
	Bibliography	55
4	Green Chemistry and Sustainable Development	56
	<i>Thomas E. Graedel</i>	
1	The Concept of Sustainability	56
2	Green Chemistry and Sustainability's Parameters	56
2.1	Sustainable use of chemical feedstocks	57
2.2	Sustainable use of water	58
2.3	Sustainable use of energy	59
2.4	Environmental resilience	59
3	A Sustainability Scenario	60
	References	60
5	Life-cycle Assessment: a Tool for Identification of More Sustainable Products and Processes	62
	<i>Adisa Azapagic</i>	
1	Introduction	62
2	The LCA Methodology	62
2.1	Methodological framework	63
3	The Applications of LCA	69
3.1	Product-oriented LCA	69
3.2	Process-oriented LCA	73
4	Conclusions	80
5	Appendix	81
5.1	Definition of environmental impacts	81
	References	83
6	Industrial Processes using Solid Acid Catalysts	86
	<i>Mark A. Harmer</i>	

1	Introduction	86
2	Concepts in Acidity and Solid Acid Catalysts	87
3	Industrial Applications of Solid Acid Catalysts	90
3.1	Zeolite-based solid acid catalysts	90
3.2	Heteropolyacid-based solid acid catalysts	98
3.3	Sulfated zirconia	102
3.4	Ion-exchange resins	104
3.5	Acidic and pillared clays	107
4	Some Recent Developments in Catalytic Materials and Processes	108
4.1	The 'Kvaerner Process' and esterification chemistry	108
4.2	Nafion [®] /silica nanocomposites	109
4.3	Haldor-Topsoe alkylation process to high-octane fuels	114
4.4	Mobil-Badger cumene process	115
4.5	Isodewaxing process (Chevron)	116
5	Summary	117
	Acknowledgements	117
	References	117
7	Micelle-templated Silicas as Catalysts in Green Chemistry	120
	<i>Duncan Macquarrie</i>	
1	Introduction	120
2	Structured Mesoporous Materials	120
2.1	Synthesis of micelle-templated materials	120
2.2	Post-functionalisation of micelle-templated materials	123
2.3	Direct preparation of organically modified micelle-templated silicas	123
3	Catalytic Applications	125
3.1	Fundamental activity of micelle-templated silicas and aluminosilicas	125
3.2	Micelle-templated materials with enhanced acidity	126
3.3	Oxidation catalysis	128
3.4	Base catalysis (other than oxidations)	139
3.5	Enantioselective catalysis	144
4	Conclusion	146
	References	147
8	Polymer-supported Reagents	150
	<i>Georges Gelbard</i>	

1	Introduction	150
1.1	A breakthrough in organic synthetic methods or a fancy for doing things differently?	150
1.2	Polymeric tools for organic synthesis	150
1.3	What is really possible and what is still expected	151
2	Making Functional Polymers	152
2.1	General schemes	152
2.2	Required properties	153
2.3	Copolymerisation with usual monomers	153
2.4	Polystyrenes	154
2.5	Spacers	155
2.6	Polyacrylates	156
2.7	Polyvinylpyridines	158
2.8	Polybenzimidazoles	158
2.9	Polyphosphazenes	158
2.10	Chlorofluoropolymers	158
3	Syntheses with Polymer-supported Reagents	159
3.1	Acid chlorides and anhydrides	161
3.2	Alcohols	161
3.3	Aldehydes and ketones	163
3.4	Amides and lactams	167
3.5	Amines	168
3.6	Azides	170
3.7	Azo dyes	170
3.8	Bromo-, chloro- and iodoaromatics	170
3.9	Carbodiimides	172
3.10	Epoxides	172
3.11	Esters and lactones	173
3.12	Ethers	174
3.13	Fluoro derivatives	175
3.14	Halides and dehalogenation reactions	176
3.15	Halohydrins	178
3.16	Isoxazolidines	178
3.17	Nitriles	180
3.18	Sulfoxides	181
3.19	Thiocyanates and ureas	181
3.20	Thiiranes, thiols and disulfides	181
3.21	Wittig and Wittig-related reactions	183
4	Conclusion	183
	References	183
9	Biocatalysis	188
	<i>Herbert L. Holland</i>	
1	Introduction	188

2	Chemical Production by Biocatalysis	188
2.1	Bulk chemicals	188
2.2	Pharmaceuticals	190
2.3	Flavour and fragrance compounds	191
2.4	Carbohydrates	192
2.5	Enantiomerically pure synthons	194
2.6	Polymers	195
3	Green Biocatalytic Processes	197
3.1	Biocatalysis in supercritical CO ₂	198
3.2	Biocatalysis in waste treatment	198
3.3	Biodesulfurisation	202
4	Conclusions	202
	References	203
10	Recent Advances in Phase-transfer Catalysis	206
	<i>Yoel Sasson and Gadi Rothenberg</i>	
1	Introduction	206
2	Progress in Classical PTC Reactions	207
2.1	Nucleophilic aliphatic and aromatic substitutions	207
2.2	Phase-transfer catalysis elimination and isomerisation reactions	208
2.3	Base-promoted C, N, O and S alkylation and arylation reactions	211
2.4	Alkylations (C, N, O and S) in alicyclic and heterocyclic syntheses	215
3	Inverse PTC	218
4	Three Liquid Phases and Triphase Catalysis	220
5	Asymmetric PTC	222
6	Phase-transfer Catalysis in Polymerisation Processes	227
7	Applications of PTC in Analytical Chemistry	230
8	Phase Transfer Combined with Metal Catalysis	230
8.1	Phase transfer in homogeneous transition metal catalysis	230
8.2	Catalysis by onium-salt-stabilised transition metal nanoclusters	233
8.3	Phase transfer in heterogeneous catalysis	234
8.4	Phase-transfer catalysis activation of metallic and non-metallic reagents	239
9	Hydrogen Peroxide and Other PTC Oxidations and Halogenations	239
9.1	Hydrogen peroxide and alkyl hydroperoxide oxidations	239
9.2	Other oxidising agents	241
