

The background of the cover is a high-magnification micrograph of a glass-ceramic material. It shows a complex network of dark, angular crystalline regions separated by lighter, more uniform glassy phases. Numerous small, circular features, likely pores or second-phase particles, are distributed throughout the structure. Overlaid on this image is a series of overlapping rectangular frames in white, dark blue, and red. The title 'GLASS-CERAMIC TECHNOLOGY' is centered within these frames. 'GLASS-CERAMIC' is in white on a dark blue background, while 'TECHNOLOGY' is in red on a white background.
