

Hydrosystems Engineering Reliability Assessment and Risk Analysis

- ✓ Safety and reliability in varying design scenarios
- ✓ Mathematical tools for solving hydrosystem engineering problems
- ✓ How to conduct risk and reliability assessments

Dr. Yeou-Koung Tung
Dr. Ben-Chie Yen
Charles Steven Melching

Hydrosystems Engineering Reliability Assessment and Risk Analysis

The sponsoring editor for this book was Larry Hager and the production supervisor was Richard C. Ruzycka. The art director for the cover was Anthony Landi. It was set in Century Schoolbook by International Typesetting and Composition.

Printed and bound by RR Donnelley.

This book was printed on recycled, acid-free paper containing 10% postconsumer waste.

McGraw-Hill books are available at special quantity discounts to use as premiums and sales promotions, or for use in corporate training programs. For more information, please write to the Director of Special Sales, McGraw-Hill Professional, Two Penn Plaza, New York, NY 10121-2298. Or contact your local bookstore.

Contents

| | |
|---|-----------|
| Preface | xi |
| Acknowledgments | xv |
| Chapter 1. Reliability in Hydrosystems Engineering | 1 |
| 1.1 Reliability Engineering | 1 |
| 1.2 Reliability of Hydrosystem Engineering Infrastructure | 2 |
| 1.3 Brief History of Engineering Reliability Analysis | 6 |
| 1.4 Concept of Reliability Engineering | 7 |
| 1.5 Definitions of Reliability and Risk | 10 |
| 1.6 Measures of Reliability | 13 |
| 1.7 Overall View of Reliability Analysis Methods | 15 |
| References | 16 |
| Chapter 2. Fundamentals of Probability and Statistics for Reliability Analysis | 19 |
| 2.1 Terminology | 19 |
| 2.2 Fundamental Rules of Probability Computations | 21 |
| 2.2.1 Basic axioms of probability | 21 |
| 2.2.2 Statistical independence | 22 |
| 2.2.3 Conditional probability | 23 |
| 2.2.4 Total probability theorem and Bayes' theorem | 24 |
| 2.3 Random Variables and their Distributions | 27 |
| 2.3.1 Cumulative distribution function and probability density function | 27 |
| 2.3.2 Joint, conditional, and marginal distributions | 31 |
| 2.4 Statistical Properties of Random Variables | 35 |
| 2.4.1 Statistical moments of random variables | 35 |
| 2.4.2 Mean, mode, median, and quantiles | 40 |
| 2.4.3 Variance, standard deviation, and coefficient of variation | 43 |
| 2.4.4 Skewness coefficient and kurtosis | 44 |
| 2.4.5 Covariance and correlation coefficient | 47 |
| 2.5 Discrete Univariate Probability Distributions | 49 |
| 2.5.1 Binomial distribution | 51 |
| 2.5.2 Poisson distribution | 53 |
| 2.6 Some Continuous Univariate Probability Distributions | 55 |
| 2.6.1 Normal (Gaussian) distribution | 56 |
| 2.6.2 Lognormal distribution | 60 |
| 2.6.3 Gamma distribution and variations | 63 |

| | | |
|---|--|------------|
| 2.6.4 | Extreme-value distributions | 66 |
| 2.6.5 | Beta distributions | 71 |
| 2.6.6 | Distributions related to normal random variables | 72 |
| 2.7 | Multivariate Probability Distributions | 75 |
| 2.7.1 | Multivariate normal distributions | 77 |
| 2.7.2 | Computation of multivariate normal probability | 81 |
| 2.7.3 | Determination of bounds on multivariate normal probability | 88 |
| 2.7.4 | Multivariate lognormal distributions | 91 |
| | Problems | 92 |
| | References | 101 |
| Chapter 3. Hydrologic Frequency Analysis | | 103 |
| 3.1 | Types of Geophysical Data Series | 104 |
| 3.2 | Return Period | 108 |
| 3.3 | Probability Estimates for Data Series: Plotting Positions (Rank-order Probability) | 109 |
| 3.4 | Graphic Approach | 111 |
| 3.5 | Analytical Approaches | 114 |
| 3.6 | Estimation of Distributional Parameters | 119 |
| 3.6.1 | Maximum-likelihood (ML) method | 119 |
| 3.6.2 | Product-moments-based method | 121 |
| 3.6.3 | L-moments-based method | 122 |
| 3.7 | Selection of Distribution Model | 125 |
| 3.7.1 | Probability plot correlation coefficients | 125 |
| 3.7.2 | Model reliability indices | 126 |
| 3.7.3 | Moment-ratio diagrams | 126 |
| 3.7.4 | Summary | 129 |
| 3.8 | Uncertainty Associated with a Frequency Relation | 129 |
| 3.9 | Limitations of Hydrologic Frequency Analysis | 135 |
| 3.9.1 | Distribution selection: practical considerations | 135 |
| 3.9.2 | Extrapolation problems | 136 |
| 3.9.3 | The stationarity assumption | 139 |
| 3.9.4 | Summary comments | 139 |
| | Problems | 140 |
| | References | 142 |
| Chapter 4. Reliability Analysis Considering Load-Resistance Interference | | 145 |
| 4.1 | Basic Concept | 145 |
| 4.2 | Performance Functions and Reliability Index | 147 |
| 4.3 | Direct Integration Method | 149 |
| 4.4 | Mean-Value First-Order Second-Moment (MFOSM) Method | 156 |
| 4.5 | Advanced First-Order Second-Moment (AFOSM) Method | 164 |
| 4.5.1 | Definitions of stochastic parameter spaces | 164 |
| 4.5.2 | Determination of design point (most probable failure point) | 165 |
| 4.5.3 | First-order approximation of performance function at the design point | 169 |
| 4.5.4 | Algorithms of AFOSM for independent normal parameters | 173 |
| 4.5.5 | Treatment of nonnormal stochastic variables | 180 |
| 4.5.6 | Treatment of correlated normal stochastic variables | 185 |
| 4.5.7 | AFOSM reliability analysis for nonnormal correlated stochastic variables | 190 |
| 4.5.8 | Overall summary of AFOSM reliability method | 200 |
| 4.6 | Second-Order Reliability Methods | 203 |
| 4.6.1 | Quadratic approximations of the performance function | 204 |
| 4.6.2 | Breitung's formula | 208 |

| | | |
|--|--|------------|
| 4.7 | Time-Dependent Reliability Models | 211 |
| 4.7.1 | Time-dependent resistance | 213 |
| 4.7.2 | Time-dependent load | 214 |
| 4.7.3 | Classification of time-dependent reliability models | 214 |
| 4.7.4 | Modeling intensity and occurrence of loads | 215 |
| 4.7.5 | Time-dependent reliability models | 217 |
| 4.7.6 | Time-dependent reliability models for hydrosystems | 218 |
| | Appendix 4A: Some One-Dimensional Numerical Integration Formulas | 221 |
| | Appendix 4B: Cholesky Decomposition | 223 |
| | Appendix 4C: Orthogonal Transformation Techniques | 224 |
| | Appendix 4D: Gram-Schmid Ortho Normalization | 229 |
| | Problems | 231 |
| | References | 240 |
| Chapter 5. Time-to-Failure Analysis | | 245 |
| 5.1 | Basic Concept | 245 |
| 5.2 | Failure Characteristics | 246 |
| 5.2.1 | Failure density function | 246 |
| 5.2.2 | Failure rate and hazard function | 247 |
| 5.2.3 | Cumulative hazard function and average failure rate | 251 |
| 5.2.5 | Typical hazard functions | 254 |
| 5.2.6 | Relationships among failure density function, failure rate, and reliability | 255 |
| 5.2.7 | Effect of age on reliability | 257 |
| 5.2.8 | Mean time to failure | 259 |
| 5.3 | Repairable Systems | 259 |
| 5.3.1 | Repair density and repair probability | 261 |
| 5.3.2 | Repair rate and its relationship with repair density and repair probability | 263 |
| 5.3.3 | Mean time to repair, mean time between failures, and mean time between repairs | 263 |
| 5.3.4 | Preventive maintenance | 264 |
| 5.3.5 | Supportability | 272 |
| 5.4 | Determinations of Availability and Unavailability | 272 |
| 5.4.1 | Terminology | 272 |
| 5.4.2 | Determinations of availability and unavailability | 275 |
| | Appendix 5A: Laplace Transform | 282 |
| | Problems | 283 |
| | References | 286 |
| Chapter 6. Monte Carlo Simulation | | 289 |
| 6.1 | Introduction | 289 |
| 6.2 | Generation of Random Numbers | 291 |
| 6.3 | Classifications of Random Variates Generation Algorithms | 294 |
| 6.3.1 | CDF-inverse method | 294 |
| 6.3.2 | Acceptance-rejection methods | 296 |
| 6.3.3 | Variable transformation method | 298 |
| 6.4 | Generation of Univariate Random Numbers for Some Distributions | 299 |
| 6.4.1 | Normal distribution | 299 |
| 6.4.2 | Lognormal distribution | 301 |
| 6.4.3 | Exponential distribution | 301 |
| 6.4.4 | Gamma distribution | 302 |
| 6.4.5 | Poisson distribution | 302 |
| 6.4.6 | Other univariate distributions and computer programs | 303 |
