TABLE OF CONTENTS

Preface

xv

1. Introduction

1.1. Introduction1

1.2. Refining Processes1

1.2.1. Physical Separation Processes1

1.2.1.1. Crude Distillation1

1.2.1.2. Solvent Deasphalting2

1.2.1.3. Solvent Extraction2

1.2.1.4. Solvent Dewaxing3

1.2.2. Chemical Catalytic Conversion Processes3

1.2.2.1. Catalytic Reforming3

1.2.2.2. Hydrotreating3

1.2.2.3. Catalytic Hydrocracking3

1.2.2.4. Catalytic Cracking3

1.2.2.5. Alkylation3

1.2.2.6. Isomerization4

1.2.3. Thermal Chemical Conversion Processes4

1.2.3.1. Delayed Coking4

1.2.3.2. Flexicoking4

1.2.3.3. Visbreaking4

1.3. Refinery Configuration4

1.3.1. Type of Products6

1.3.2. Environmental Regulation6

1.3.3. Crude Assay and Quality6

1.3.4. Refinery-petrochemical Integration9

1.3.5. Development of New Technology9

2. Refinery Feedstocks and Products

2.1. Introduction11

2.2. Composition of Crude Oils11

2.2.1. Paraffins12

2.2.2. Olefins13

2.2.3. Naphthenes (cycloalkanes)14

2.2.4. Aromatics14

2.2.5. Sulphur Compounds16

2.2.6. Oxygen Compounds17

2.2.7. Nitrogen Compounds18

2.2.8. Metallic Compounds19

2.2.9. Asphaltenes and Resins19

|                                                                              |    |
|------------------------------------------------------------------------------|----|
| 2.3. Products Composition                                                    | 20 |
| 2.3.1. Liquefied Petroleum Gas (LPG)                                         | 21 |
| 2.3.2. Gasoline                                                              | 21 |
| 2.3.3. Kerosene                                                              | 22 |
| 2.3.4. Jet Fuel                                                              | 22 |
| 2.3.5. Diesel Fuel                                                           | 22 |
| 2.3.6. Fuel Oil                                                              | 22 |
| 2.3.7. Residual Fuel Oil                                                     | 23 |
| 2.3.8. Lube Oil                                                              | 23 |
| 2.3.9. Asphalt                                                               | 23 |
| 2.3.10. Petroleum Coke                                                       | 23 |
| 2.4. Physical Property Characterization Data                                 | 23 |
| 2.4.1. Fractionation                                                         | 23 |
| 2.4.2. True Boiling Point Distillation                                       | 23 |
| 2.4.3. ASTM Distillation                                                     | 24 |
| 2.4.4. Simulated Distillation by Gas Chromatography                          | 24 |
| 2.4.5. API Gravity                                                           | 24 |
| 2.4.6. Pour Point                                                            | 25 |
| 2.4.7. Viscosity                                                             | 25 |
| 2.4.8. Refractive Index                                                      | 25 |
| 2.4.9. Freezing Point                                                        | 25 |
| 2.4.10. Aniline Point                                                        | 25 |
| 2.4.11. Flash Point                                                          | 26 |
| 2.4.12. Octane Number                                                        | 26 |
| 2.4.13. Cetane Number                                                        | 26 |
| 2.4.14. Smoke Point                                                          | 26 |
| 2.4.15. Reid Vapour Pressure                                                 | 27 |
| 2.4.16. Water, Salt and Sediment                                             | 27 |
| 2.4.17. Molecular Weight                                                     | 27 |
| 2.5. Chemical Analysis Data                                                  | 27 |
| 2.5.1. Elemental Analysis                                                    | 27 |
| 2.5.2. Carbon Residue                                                        | 28 |
| 2.5.3. Detailed Hydrocarbon Analysis                                         | 28 |
| 2.5.4. Hydrocarbon Family Analysis                                           | 28 |
| 2.5.5. Aromatic Carbon Content                                               | 28 |
| 2.5.6. SARA Analysis                                                         | 29 |
| <b>3. Thermophysical Properties of Petroleum Fractions and Crude Oils</b>    |    |
| 3.1. Introduction                                                            | 33 |
| 3.2. Basic Input Data                                                        | 34 |
| 3.2.1. Specific Gravity                                                      | 34 |
| 3.2.2. Boiling Point Curves                                                  | 35 |
| 3.2.3. ASTM Distillation                                                     | 35 |
| 3.2.4. True Boiling Point Distillation                                       | 36 |
| 3.2.5. Conversion between ASTM and TBP Distillation                          | 36 |
| 3.3. Pseudo-Components                                                       | 40 |
| 3.3.1. Breakup of TBP Curve into Pseudo-components                           | 41 |
| 3.3.2. Breakup of TBP Curve into Pseudo-components<br>Using Generalized Form | 43 |

|                                                                  |    |
|------------------------------------------------------------------|----|
| 3.3.3. Calculation of Pseudo-components Specific Gravities       | 47 |
| 3.4. Thermophysical Properties Calculation                       | 48 |
| 3.4.1. Molecular Weight                                          | 48 |
| 3.4.2. Viscosity                                                 | 49 |
| 3.4.3. Refractive Index                                          | 49 |
| 3.4.4. Molecular Type Composition of Petroleum Fractions         | 50 |
| 3.4.5. Pseudo-critical Constants and Acentric Factors            | 52 |
| 3.4.5.1. Pseudo-critical Temperature                             | 53 |
| 3.4.5.2. Pseudo-critical Pressure                                | 53 |
| 3.4.5.3. Acentric Factor                                         | 53 |
| 3.4.6. Generalized Equation for Thermophysical Properties        | 54 |
| 3.5. Calculation of Enthalpy of Petroleum Fractions              | 55 |
| 3.6. Estimation of Properties Related to Phase Changes           | 58 |
| 3.6.1. Cubic Equations of State                                  | 58 |
| 3.6.2. Vapour–liquid Equilibrium                                 | 59 |
| 3.7. Calculating Properties Utilizing UNISIM Software            | 64 |
| Questions and Problems                                           | 66 |
| <br>                                                             |    |
| <b>4. Crude Distillation</b>                                     |    |
| 4.1. Introduction                                                | 69 |
| 4.2. Process Description                                         | 70 |
| 4.3. Operation of Crude Distillation Units                       | 72 |
| 4.3.1. Fractionation                                             | 72 |
| 4.3.1.1. Cut Points                                              | 74 |
| 4.3.1.2. Degree of Fractionation                                 | 74 |
| 4.3.2. Overflash                                                 | 74 |
| 4.3.3. Column Pressure                                           | 75 |
| 4.3.4. Overhead Temperature                                      | 75 |
| 4.3.5. Pre-flash Columns and Crude Column Capacity               | 76 |
| 4.4. Crude Oil Desalting                                         | 76 |
| 4.4.1. Types of Salts in Crude Oil                               | 76 |
| 4.4.2. Desalting Process                                         | 77 |
| 4.4.3. Description of Desalter                                   | 78 |
| 4.4.4. Desalter Operating Variables                              | 79 |
| 4.5. Vacuum Distillation                                         | 80 |
| 4.5.1. Process Description                                       | 81 |
| 4.6. Crude Distillation Material Balance                         | 82 |
| 4.6.1. Crude Assay Data                                          | 82 |
| 4.6.2. Material Balance                                          | 85 |
| 4.6.3. Sulphur Material Balance                                  | 86 |
| 4.7. Design of Crude Distillation Units Using Process Simulators | 88 |
| Questions and Problems                                           | 92 |
| <br>                                                             |    |
| <b>5. Catalytic Reforming and Isomerization</b>                  |    |
| 5.1. Introduction                                                | 95 |
| 5.2. Catalytic Reforming                                         | 95 |
| 5.2.1. Reformer Feed Characterization                            | 95 |
| 5.2.2. Role of Reformer in the Refinery and Feed Preparation     | 96 |

|                                                                |     |
|----------------------------------------------------------------|-----|
| 5.2.3. Research Octane Number                                  | 96  |
| 5.2.4. Reforming Reactions                                     | 98  |
| 5.2.4.1. Naphthene Dehydrogenation of Cyclohexanes             | 98  |
| 5.2.4.2. Paraffin Dehydrogenation                              | 98  |
| 5.2.4.3. Dehydrocyclization                                    | 98  |
| 5.2.4.4. Isomerization                                         | 98  |
| 5.2.4.5. Hydrocracking Reactions                               | 99  |
| 5.2.4.6. Coke Deposition                                       | 99  |
| 5.2.5. Thermodynamics of Reforming Reactions                   | 99  |
| 5.2.6. Reaction Kinetics and Catalysts                         | 102 |
| 5.2.7. Process Technology                                      | 102 |
| 5.2.7.1. Semi-regenerative Fixed Bed Process                   | 102 |
| 5.2.7.2. Continuous Regenerative (moving bed)                  |     |
| CCR Platforming UOP Process                                    | 106 |
| 5.2.8. Material Balance in Reforming                           | 106 |
| 5.2.8.1. Material Balance Using Emperical Correlations         | 106 |
| 5.2.8.2. Material Balance Using Conversion Criteria            | 106 |
| 5.2.9. Process Simulation of Reformer by Equilibrium Reactions | 106 |
| 5.3. Isomerization of Light Naphtha                            | 118 |
| 5.3.1. Thermodynamics of Isomerization                         | 118 |
| 5.3.2. Isomerization Reactions                                 | 119 |
| 5.3.3. Isomerization Catalysts                                 | 119 |
| 5.3.3.1. Standard Isomerization Catalyst                       | 120 |
